

Q1: What are some things you are concerned about regarding the facility upgrades?

Started: 28 Feb 2014 **Ended:** 31 Mar 2014

To view the J.C. Charyk Hanna School results, click on each of the three questions below in turn. You will then see the groups of ideas from the participants. The ideas are listed in order, starting with the highest priority. By clicking on each of the ideas, you can see the individual responses that make up a group.

The overall rating is the total number of stars assigned to that group of thoughts. The participant count is the number of people who assigned at least one star to that group. Finally, the average rating tells you how many stars on average that group received.

Priorities Summary

Overall rating - total number of stars assigned to that group of thoughts

Participant count - the number of people that assigned stars to that group of thoughts

Average rating - the average number of stars that was given to that group of thoughts. The overall rating divided by the participant count. Average Rating can indicate a small number of people are passionate about a particular subject. You will often see a group of thoughts with a higher average rating than a group higher in the list. This can indicate that the people that did add stars to that group felt it was very important.

	overall rating	participant count	average rating
Doing it right: planning properly and not rushing	219	91	2.41
Adequate space and staffing for a new K-12 facility	176	76	2.32
Gym space and timetabling, gym equipment upgrades.	175	78	2.24
Don't lose focus on the needs of the students	172	76	2.26
Making sure technology is reliable, relevant and accessible	160	75	2.13
Money is used towards bettering the school and not just for aesthetics.	151	74	2.04
That all the grades (K - 12) will be considered.	150	73	2.05
Class disruptions during school year	141	59	2.39
Better heating system, air conditioning and air quality	138	71	1.94
Keeping students with age appropriate peers	124	61	2.03
Fine arts facilities	119	56	2.12
going from 2 principals to 1 - teachers being cut back	118	51	2.31
Washrooms and changerooms need an upgrade	112	61	1.84

Q1: What are some things you are concerned about regarding the facility upgrades?

	overall rating	participant count	average rating
Teachers are ensured enough room.	106	57	1.86
That the programming won't expand	102	53	1.92
Are the facilities going to work with this many students?	100	52	1.92
Maintain and add areas for students to have lunch and have down time.	99	58	1.71
Consult with the educators	94	45	2.09
I am concerned about parking facilities for more students and staff	82	53	1.55
The ability to blend the two school cultures into one.	78	40	1.95
bigger lockers throughout the school we cant fit everything in more selves	74	30	2.47
Not knowing what the upgrades are	70	39	1.79
Playground Design	66	35	1.89
That pre-existing facilities won't be upgraded	65	41	1.59
Inability to support special needs	64	35	1.83
Loss of flexibility from a tight schedule	63	39	1.62
Will it result in more area for the cafeteria?	63	34	1.85
Will there be enough room for the two FRW's and Project REACH Workers?	63	31	2.03
Funding and cost issues	59	34	1.74
Will the school incorporate the Gymnastics club with the new upgrades?	55	24	2.29
Too many group work classrooms	54	31	1.74
Security	50	30	1.67
Will we get a nicer library	46	25	1.84
Not enough collaboration	44	26	1.69
Define the terms modernization, 21 century, upgrades.	43	26	1.65
Students might be in an unsafe environment.	40	22	1.82
Negative impact on people's decision to relocate here	32	17	1.88
Combining town and school libraries	30	20	1.50
Making a new lunch time for the k to 3.	27	19	1.42
might be a good thing as kids do adjust to change better than adults do	18	14	1.29

Q1: What are some things you are concerned about regarding the facility upgrades?

	overall rating	participant count	average rating
i think our school should bring in a cosmetics class for girls 7-10	12	6	2.00
No concerns	10	5	2.00

What are some things you are concerned about regarding the facility upgrades?

Adequate space and staffing for a new K-12 facility	G5
Thought: Space	T1
With more people moving to Hanna will there be enough space for all the kids. Would we need to add on to the school.	
Thought: Classroom Space	T4
Enough room in classrooms for modern learning outcomes and strategies.	
Thought: Classroom sizes will be smaller but student enrollment	T6
As more students will be coming to the school it is imperative to have large classrooms that will continue to work in the existing framework. However, it seems we already have many small classrooms and with the eventual melding of the two schools there may be a likelihood of even smaller classrooms. As students are becoming 21st century learners and curriculum is transitioning to project based learning it is imperative to have enough room for students to move freely and interact with each other.	
Thought: Is there going to be enough room for all of the students?	T13
Thought: Is there going to be enough classrooms and room to teach every class?	T14
Thought: Cramped spaces	T19
Regardless of the formula used to calculate school spaces, if the hallway in the south of the school is too big, knock down the wall, make it smaller and add it to a classroom. No grandfathering older schools into the utilization formula is ridiculous and irresponsible. If the formula is to be followed, every gym, every classroom, every space must be used all the time. This creates a situation which is pleasant for no one.	
Thought: Adequate Space	T24
I am concerned that we will not have adequate space to offer programs to our students. Rooms may be cut smaller and programs will suffer because of loss of space. Specifically gym classes having to share space. Home Ec. lab being cut in half. Art room being cut in half.	
Thought: Ensuring adequate space for all student in there respective grades	T35
Combination change rooms and phys ed classes are not acceptable	
Thought: space	T37
Will there be enough space to have all the students in one school and not lose classrooms to keep running the current programs	
Thought: Crowded hallways	T54
It doesn't matter how wide the hallways are when you add more students you add more congestion. In emergency situations will it be safe to evacuate?	

What are some things you are concerned about regarding the facility upgrades?

(continued)

Adequate space and staffing for a new K-12 facility	G5
Thought: Adequate space for all students.	T69
Thought: With the upgrade will more classes/teachers be available? I am unsure of the process of the two schools becoming one and I am concerned that even more teachers or class elective will be lost.	T89
Thought: The school not being bug enough, and being too crowded.	T90
Thought: Adequate room for all of the students.	T92
Thought: Adequate teaching staff.	T94
Thought: Inadequate classroom space I'm concerned that older students will not have an adequate variety of options offered, due to insufficient classroom availability.	T97
Thought: Essential programs or spaces will be left out I'm concerned that there won't be enough space for break out spaces for small groups.	T98
Thought: To crowded The school right now has enough space issues but adding more students won't help	T105
Thought: Having enough room for all classrooms	T108
Thought: losing classroom space and programs We have great programs and extra curricular activity that might be lost so as to accommodate more students without enlarging the footprint of the school	T110
Thought: Adequate space and staffing for a new K-12 facility Ensuring the design takes into consideration all the programming needs that will be required. New VC Suites for high school, music programming for elementary, Daily Physical Education, etc.	T111
Thought: Lack of space for all involved, students & teachers. Since it is important for students to have their space to excel, my concern is this upgrade will just squeeze the people together. If the upgrade accounts for expansion to allow primary students their own gym, their own library space, etc., then this could work. Also, allowing upgrades to the original areas of the elementary, Jr. & Sr. High areas will give all students a chance to experience something "New" as well. Hopefully this expansion will allow upgrades to incorporate Air Conditioning & adequate heating which will allow comfort for all, students & teachers. Also, I hope the expansion will allow for the addition of green space for all ages for shelter in adverse weather, cold & hot. And, it will add an uplifting look for the area.	T120

What are some things you are concerned about regarding the facility upgrades?

(continued)

Adequate space and staffing for a new K-12 facility	G5
Thought: Spacing	T126
Ensuring adequate classroom space for every class, as well as for their required resources.	
Thought: The amount of room students will have.	T131
Thought: Will there be adequate sq. footage to house another 135 students from HPS?	T141
Will we need to add on to the 'footprint' in order to create enough classrooms for another 8-9 primary classrooms.	
Thought: Concerns regarding the facility upgrades.	T175
I am mildly concerned with things like very crowded hallways at all time, and the fact that there may be an increase in bullying if the younger kids move to this school.	
Thought: Lack of space for all the needs for the children.	T179
class room sharing, too many kids in one class at a time. My kids are from 2 very big grades in the school and I am worried that their class number will become bigger to accommodate the extra grades in the school.	
Thought: Will the school be over crowded?	T183
Will there be enough room for this many children/staff to work efficiently?	
Thought: Number of Classrooms	T185
I would like for there to be more than enough classrooms. Sizing that provides just enough does not work well with scheduling ect. Fitting everyone and making it work with the various schedules, especially at the highschool level has been a issue as it is. Pretty sure it is not going to get better with less available classrooms. It is fine to say that "adequate" is good enough unless it is you as a student who's future is being affected. The numbers of students in each Grade is always going to fluctuate. When I graduated we were a group of 48. Before and after years were in the low 30's. Plan for larger groups. When there are students ending up in closet spaces to take high school art classes or two separate levels of social studies high school courses stuck into the same classroom at the same time for lack of room. Adding more students without more class rooms is not an acceptable possibility.	
Thought: Adequate Space	T199
We heard many times that there would be no space added on, and were wondering why we would not increase the space to accommodate appropriately all students, so they are not sardined in. We all know that young children need space!	
Thought: Space to accommodate kids	T202
Thought: I do not want to see classroom sizes dropped.	T206

What are some things you are concerned about regarding the facility upgrades?

(continued)

Adequate space and staffing for a new K-12 facility

G5

By adding the additional primary school children, I do not want to see our children learning in smaller, more cramped, classrooms as we try to fit eight more class rooms (plus music room, etc.) in the existing school foot print.

Thought: Keep sizing of parts of the current facilities the same

T210

With the number of students currently in jcc, I would like to see gymnasiums kept the way they are. Maybe the smaller gym could be used for the k-3 and 4-6. Build on to the existing facility for the k-3, don't renovate jcc to house everyone

Thought: Classroom sizes, student movement

T245

Thought: If there will be adequate facilities for all students.

T258

Thought: Programming Space

T261

I am concerned about having enough space to deliver the programs students require to succeed. As the service delivery model for Alberta Health Services has changed, many support programs are now delivered to small groups of children (e.g., targeted speech group or printing group) rather than in a one-on-one setting. As these groups can consist of students from various classes and or grades, I worry if we will have a quiet space for these students to receive the benefits of these programs?

Are the facilities going to work with this many students?

G12

Thought: Enough room for all to participate in gym.

T34

Recent studies show that our children are not getting enough time and/or opportunities for physical activity. I do realize that it is not strictly up to the schools to promote physical activity, as parents should play a bigger part in their child's health. BUT, the schools need to encourage physical activity. It would be great if all grades from K-9 had one gym class a day, but I'm not sure if that works within the schedule. All high school students should be given opportunity to be part of a phys ed. class. Of course, depending on the weather and the time of year, some phys ed. classes can be held outdoors, at the arena, at the curling rink, at the golf course, on the walking paths, etc. I do understand that some classes may have to share the gym, and I see no problem with that, especially with the younger grades.

Thought: Down to one gymnasium. The classes had to share last year.

T181

The classes were having to share the gym last year as to timetable scheduling. We have 2 gyms now and they are still sharing. Very hard for the children to get their full exercise when you have students from all grade levels.

Thought: Are the facilities going to work with this many students?

T184

Gym, Library time etc. being accessible enough.

What are some things you are concerned about regarding the facility upgrades?

Better heating system, air conditioning and air quality G8

Thought: Heating system needs to be upgraded T9

The heating system in the school is quite old and doesn't work properly, so some classrooms are very cold, while others are too warm. The heating problem makes it hard to work, because if it's too cold or too hot it's harder to think about what you are supposed to be doing.

Thought: Big concern is the heating has been inconsistent throughout the building T81

leaving children very cold and unable to focus on the assignments. Is the heating system too old to be maintained over the long haul.

Thought: some rooms are really cold and need upgrading of the heating T159

Thought: Heating and windows in some rooms are not very good T163

Thought: Also air conditioning and air quality T215

Thought: Heating/cooling T224

The heating system in the school is currently terrible. You never know if it will be too hot or too cold. Students shouldn't have to shiver through classes or be so warm they feel like sleeping. Is AC a possibility?

Thought: Windows T225

The windows in JCC are really leaky. I would like to see more windows and better quality windows. Also blinds like we have now that let the light in but not the heat are good but it would be nice to have a second set that actually make the room dark as well.

Thought: the heating system T236

The heating system has some problems. One room is boiling, the next freezing, and there is nothing we can do about it. It's hard to think when you're too hot or cold.

bigger lockers throughout the school we cant fit everything in more selves G15

Thought: bigger lockers throughout the school we cant fit everything in more selves T160

Thought: We need bigger lockers we have to much stuff T165

Class disruptions during school year G17

Thought: Working in a building that is going through a major modernization. T2

I am worried how much the disruption will affect my students and my programs.

What are some things you are concerned about regarding the facility upgrades?

(continued)

Class disruptions during school year	G17
Thought: Students in the building	T12
Upgrades will be done with students in the building, the utmost care and caution needs to be taken so that the students do not suffer from disruptions to their education.	
Thought: Distractions to Students	T16
New and different people in the school doing work could potentially be distracting to both students and teachers.	
Loud jobs can be distracting. It would be wise to do loud jobs before or after class time, or on weekends.	
Thought: I'm concerned about the noise	T21
The process of upgrading the facility could potentially be noisy and distracting.	
Thought: Noise	T26
My concerns about it are that we will be working in a construction zone. The noise and the people will be a distraction.	
Thought: I'm worried about them affecting classes as they are now.	T27
Thought: Class disruptions during school year	T48
There will undoubtedly have to be construction work done during the 10 months school is in session. Can the large, noisy dusty portion be mostly done during the summer? Can the tendering process be done to where jack hammers can start July 1 2014?	
Thought: Classroom disruptions	T62
Construction noise and the sheer volume of equipment, workers and debris	
Thought: Displacing current students	T63
What will the quality of the Education be during the construction phase? Where will students be learning from- in a classroom undergoing construction? Next to a construction zone? Will their space be conducive to learning? Will it be chaotic?	
Thought: Stress of staff and students during this process?	T64
What will be done to minimize the stress of students and staff during the construction?	
Thought: Disruption of classes while renovations are occurring.	T95
These renovations are obviously a big project and is going to take more than a summer to do. What happens to classrooms while they are being renovated? Will students have to relocate to a building that is not the school?	
Thought: Disruption of class instruction	T115

What are some things you are concerned about regarding the facility upgrades?

(continued)

Class disruptions during school year	G17
If the facility upgrade occurs during the school year, then there could be disruption of classes and loss of use of some of the facilities.	
Thought: Renovation Time	T130
Is the construction going to have a severely negative impact on classes for the next handful of years?	
Thought: displacement of students during process	T171
Will students to moved to another facility?	
Thought: Students will not have the proper teaching when changes are being made.	T187
Thought: I'm afraid that home economics will be temporarily shut down.	T189
I really enjoy home ec the cooking part at least and if your making changes we can't just cook on a desk.. I think that it might be a pain in the butt if it is closed during school time	
Thought: The disruption and displacement of the existing students and staff.	T192
Thought: Construction & Noise during School hours	T200
We are concerned about the time of day when school is taking place and the safety issues of supplies and strangers around our children.	
Thought: Second concern	T216
My second concern is that they just throw everyone in the school before they add on or change things that's not going to be good if that happens.	
Thought: The construction noise while students are in classes.	T231
Thought: Disruption of classes	T243
Is there going to be disruption of classes during construction? I would think it will be hard for the kids to concentrate on their classes with the sounds of construction around them	
Thought: Working in other areas while construction is going on.	T266
How well will we be able to work when we are sitting in a hallway for class while loud construction is going on?	

Combining town and school libraries	G19
Thought: Combining town and school libraries	T49
There has been discussion about combining the Hanna public library and school library together. Will there be room / money to do this?	
Thought: Consider merging the school library with the Town of Hanna Library.	T207

What are some things you are concerned about regarding the facility upgrades?

(continued)

Combining town and school libraries

G19

A merge between the Hanna Library (which is currently looking to relocate) and the school should be considered, however this would not work with the currently location of the school library as it is too central in the schools structure. If the library was on the edge of the school where the public will not be walking school hallways to gain library access, such a merge may be possible, with public library funds potentially available to help with upgrades to the school library.

Consult with the educators

G25

Thought: Too many uninformed decision makers

T20

Parents want to have the best for their children, unfortunately it is some of those decisions made by the loudest voices of good intentions which have far-reaching affect on other students. It is a robbing Peter to pay Paul. Creating larger spaces for some will create smaller spaces for others. Even board members and senior administration have spent very little time in our school. The biggest problem facing the whole situation is that everyone has been to school and they are viewing the entire situation through the filter of their own personal experiences, regardless of their relevance to our own specific situation.

Thought: Have the teachers been consulted on their needs and wants?

T99

Have the teachers been consulted in a professional manner as to their wants and needs for their future classrooms? They deserve the opportunity to have input other than at public town hall meetings. The town hall meetings are great for parents and the community to have their input but teachers and staff should be consulted at a different time so that their opinions are considered. There isn't enough time in two hours for parents, community and staff to all be able to say what they would like.

Thought: Consult with the educators

T147

Without satisfied and engaged staff, the end result of well educated students, will not be met. The staff are part of the problem when it comes to communication issues and smack talk in PLRD as they do not feel empowered or listened to and tend to vent or speak to their friends and peers.

Define the terms modernization, 21 century, upgrades.

G29

Thought: Define the terms modernization, 21 century, upgrades.

T154

I hear modernization used. What does this mean? Existing or expanded footprint? Existing or expanded program options? Define modernization please.

What are some things you are concerned about regarding the facility upgrades?

Doing it right: planning properly and not rushing	G32
Thought: Will there be enough classrooms for growth. If there are no extra classrooms - we will be destined to have large class sizes if and when our school population increases - which it is projected to do in the not so distant future.	T3
Thought: Plans may be focused on what current ideas are and not focus in the future Many of the current staff will not remain in 5-10 years but their thoughts may be the most heard. The education system is changing and needs to have influence from those who will be around to hear these ideas. Rather than plan for what's happening right now it's necessary to think about where we will be in 20 years and plan for where we want to be not where we are.	T7
Thought: Poor Quality Understanding that there are time pressures, the preference is that the work done be quality work creating a building that will serve the community for many years.	T11
Thought: focus of upgrades I am concerned that there will be too much community focus on adding to what is already available, rather than providing new opportunities for students	T25
Thought: Rushing and limited space My concern is that it is not rushed and must be done right. I don't want to see the kids just "shoved over there".	T28
Thought: Pre planning the construction phase to minimize class disruption Parking and pick up/drop off is currently ridiculous need to plan this out	T36
Thought: Use of upstairs wasted space. Currently there is wasted meeting room space on the second floor, by the library and the gym I think. Is that space going to be used in the modernization?	T43
Thought: That the modernization will just be enough to fit the primary school in.t	T74
Thought: Rushing through the process. I'm worried that the planning process will be rushed and there won't be enough time to thoroughly think through long range plans. This is a huge project and we need to take the time to consider all the possibilities before rushing into the design process.	T96
Thought: keep in mind when doing the upgrade that it should last for 5- 10 years not a quick fix for now	T134
Thought: That it won't be enough.	T139
Thought: I don't want to see the school stay too trapped in old-style architecture.	T172

What are some things you are concerned about regarding the facility upgrades?

(continued)

Doing it right: planning properly and not rushing

G32

I would really like to see the design take on a modern twist. There are many great ideas floating around and I think it is time for Hanna to really break out of the mold, and do something innovative and exciting while they have the opportunity.

Thought: Sustainability

T194

would there be a guarantee of staff in place to utilize the new facility; would there be funds available in the future if upgrades would be required

Thought: A solarium would be a welcome addition

T203

Thought: Doing it right

T208

I think the amalgamation of the 2 schools can be a great thing if it is done right. As long as there is careful thought and planning in this process-which it appears is happening- a K-12 school will be a great thing.

Thought: The planning process is happening much too quickly.

T249

Since we are being given the opportunity to do this modernization/amalgamation with Hanna Primary School, the time must be taken to do it RIGHT. Students, teacher and staff must live with the results of these plans for a significantly long time. No good comes from rushing through the process.

Thought: Danger of getting caught up in what already exists/how things used to be

T251

Let's think outside the box and really make the modernization of JCC up to date and relevant to what the students need!! We can't get caught up in "how it's always been has been good enough".

Thought: Trying to do to much with to little -

T255

infrastructure not engineered for grade school-don't want to see a closet turned into a bathroom -

Don't lose focus on the needs of the students

G33

Thought: In this process programs need to be the most important topic

T119

Numerous programs have been discontinued in the last 15 years in the school. Focus needs to be on the students and what they want to learn. If we can engage them in their interests learning everything else will be easier.

Thought: Don't lose focus on the needs of the students

T146

With so many involved in this project, it may become easy to get distracted by square footage, sizes of rooms, etc. when we really need to focus on what is required to provide the best possible education for our students.

Thought: I am concerned about the renovations being done in the 2 most important

T268

What are some things you are concerned about regarding the facility upgrades?

(continued)

Don't lose focus on the needs of the students

G33

years of my high school education.

Fine arts facilities

G2

Thought: Theatre addition should have separate access to be utilized by clubs.

T78

There are people in the community who could be hired as a resource to promote the Arts. The addition of a theatre would be a benefit and it could be utilized by surrounding communities.

Thought: Will expansion allow for drama/music classes?

T86

If auditorium is included in the plans, will drama and music be offered with qualified teachers?

Thought: an auditorium

T196

Thought: Fine Arts

T220

JCC could use some fine arts facilities. Specifically the current programs such as photography and videography need a space that would support those programs. The art space needs to stay and it would be great to have a proper space for a drama room and stage. The drama room attached to the gym just does not work! Perhaps the drama space could have tiered seating and therefore be used for assemblies and presenting productions. A band room would also be nice.

Thought: the art room

T237

The art room is not nice. There isn't enough storage space and the sinks are really dirty and clogged with paint. Also, it would be really great if there were spaces designed for their functions - a space to paint, tables designed for working with clay, and other things like that.

Thought: A room that is designed for music and band.

T238

It would be really nice to have a room that is really meant to be used for music, with a nice piano and seating for band practices.

Funding and cost issues

G26

Thought: Getting the upgrade done soon.

T47

I was pleasantly surprised that the funding was made available for us. Now my concern is that the US Dollar is on its last legs, and will probably fail by 2016. Can we get the changes done by summer 2015?

Thought: The cost of the facility, where are the financial needs met from.

T51

Building projects always cost more than the quotes that are given.

What are some things you are concerned about regarding the facility upgrades?

(continued)

Funding and cost issues	G26
Thought: Taxes	T56
How can our taxes not go up to pay for the new improvements? Yes, the school board is receiving funds from the government but who has to pay for the infrastructure/building of the new road(s) which will be required to have safe and proper access to the school? Not the government. It will be the responsibility of the taxpayers--me!	
Thought: Old facility	T58
What happens to the old facility? Demolished...which again costs money. Is this included in the funds we are receiving? It may but the town (being me as a taxpayer) will have some costs associated with this procedure. Then there may be more costs for upgrading that land for residential use.	
I am also wanting to see the old building being moved to the museum grounds as it is a historic building. Again...more costs to the taxpayers. ...me.	
Thought: Increase in costs to parents.	T114
These costs come by way of increased taxes and school fees. It seems we pay more and more school fees every year.	
Thought: Cost overruns	T191
Concerned poor planning may result in overspending	
Thought: Funding may be withdrawn	T214
Thought: How will we fit all our new wants in with limited money and space?	T267
Everyone wants a variety of things. Are we going to be able to afford it all? Are we going to be able to fit everything in without it being crowded.	

going from 2 principals to 1 - teachers being cut back	G42
Thought: Jobs	T57
I am concerned about jobs being cut/not needed. This not only impacts these specific families but also our community who could possibly leave as they no longer have employment. Our town is hurting as it is due to no new opportunities for families to move here.	
Thought: Job Stability	T122
For staff to not have their jobs jeopardized!	
Thought: Cut back on teachers as they will float from class to class	T180
Thought: going from 2 principals to 1 - teachers being cut back	T256

What are some things you are concerned about regarding the facility upgrades?

(continued)

going from 2 principals to 1 - teachers being cut back

G42

To many responsibilities for one principal - afraid of teacher and teacher aid lay off especially when it comes to special needs - historically they are the first to get cut - special needs (ADD and ADHD students usually lose out)

Gym space and timetabling, gym equipment upgrades.

G45

Thought: Not enough gym space for the number of classes

T5

My child already shares their gym class with other classes so adding more classes to the same gym spaces sounds like it will be even worse

Thought: Is there going to be 3 gyms?

T29

Gym time is already shared right now. I hope they don't have to share gym time with other grades. EG. My Gr5 year old son shared gym class with GR 8's. Which is fine. HOWEVER THEY WERE IN THE CHANGE ROOM AT THE SAME TIME AS THE GRADE 8'S UNSUPERVISED. They should not be sharing the change room at the same time. The grade 5's learned a lot of bad stuff from the grade 8's.

Thought: Not losing 2 gyms.

T40

Having 2 gyms allows sports (Basketball usually) tournaments to be hosted here. Adding 3 grades of school will also be a burden.

Thought: North Gym

T50

I don't want the North Gym to get smaller I like the size of it now

Thought: Lack of gymnasium space.

T53

Currently, there are two gyms at JC Charyk. One of these can be separated with a vinyl divider which some believe creates two gyms. It does not. When adding the additional K - 3 student body, the already lack of space will become even more pronounced.

An additional activity area is required so that all students have access to a proper learning environment.

In addition, if reconstruction is done to the black gym, the divider must be a soundproof one, rather than what exists now, in order to allow two classes to function separately.

Thought: Will there be enough gym space and after school availability?

T101

What are some things you are concerned about regarding the facility upgrades?

(continued)

Gym space and timetabling, gym equipment upgrades.

G45

There are many after school activities that occur at both schools in the gym. In the future will there be enough space and time for all of them if we lose one gym? Centennial Place was not built to be used as an extra "school" gym and should not be treated as such. Gymnastics, Indoor Soccer, Little League Basketball and extra curricular sports such as Volleyball, Basketball and Badminton will all need to have access to gym space. Is that going to be possible with only 2 gyms?

Thought: Will 2 gyms be enough? Are we able to build another?

T102

Will all students still have the opportunity for daily physical activity? Is there room to build a third gym that is smaller and used as an extra space for phys ed? It wouldn't have to have seating for spectator sports.

Thought: Not enough gym space

T109

Thought: Gym time each day

T132

Thought: Gymnasium availability for Daily Physical Education

T136

By bringing more kids into the school, I am concerned that we will lose on Daily PE. Having a PE class in a classroom just doesn't work. It would be taught by well meaning teachers who have not been trained in the area of teaching physical education.

Thought: Size of the small gym (south) currently in JCC.

T137

If you add a curtain to the gold (south) gym it will make the teaching space too small for kids to be active safely. The build of another small auxiliary gym and keeping the 2 existing gym would be an ideal thing.

Thought: Gym space and timetabling.

T143

I know most schools have only one gym, but I want to make sure the students still get enough physical education.

Thought: Gym

T156

Having heard my kids at JC talk about sharing the gym especially during the winter months I think this is something that should be looked into because it is very important that the little guys coming to the school get plenty of time to run, jump and play. I worry that if space isn't available for the little ones they will be forced to give up this time especially if the older grades have sports tournaments going on.

Thought: old gym equipment room NEEDS upgrading

T166

Thought: new equipment for the gyms

T167

Thought: Upgrade old gym equipment room

T170

Thought: Gymnasium

T178

What are some things you are concerned about regarding the facility upgrades?

(continued)

Gym space and timetabling, gym equipment upgrades.

G45

I heard that it is possible that multiple classes will be sharing the gymnasiums for their Phy-Ed classes. If this is the case, many students won't enjoy gym as much having a bunch of younger or older kids in their way. Splitting the gymnasiums in a option but that leaves less space for each class.

Thought: Physical Activity

T188

As much as I wish we were all healthier and more active in our private lives, it is just not the case in most families. Time and space needs to be made in our school for this. The schools in a rural community need to be very active in this area as there is just less options available to us rural people in our communities. Please insure to include plans allowing for the needs of physical activity.

Thought: Gym space is a concern.

T198

I would hate for our children to not have physical education every day because of lack of gym space. This generation of students need physical education to balance out their inactivity at home

Thought: Health area

T226

It would be great to have a fitness area that kids could access with weights and treadmill equipment. The biggest challenge here is to provide supervision but I think it would be great if kids could have access from 8-430.

Thought: Sports equipment is old and in need of upgrade

T232

Much of the sports equipment is old and worn, particularly in the south gym. The storage room in the south gym is also poorly lit and organized.

Thought: Weight room

T233

Most of the equipment in the weight room is old and damaged in some way. New equipment would be greatly appreciated.

Thought: Weight room

T246

New weights the ones we have are old an falling apart, a larger area for the weights, a mirror, and a larger variety

Thought: Gym Space

T260

I am concerned about adequate gym space. Between the two schools, there are 3 gyms. The 2 gyms at JCC are used regularly. To ensure we are meeting the outcomes of Daily Phys. Ed., it is essential for us to have enough gyms. Holding multiple classes in one gym is not ideal as the noise levels are intense!

Thought: Prefer to maintain both gyms.

T269

We need to maintain an active and healthy lifestyle for students and staff.

What are some things you are concerned about regarding the facility upgrades?

I am concerned about parking facilities for more students and staff	G51
Thought: High school parking. Will the current parking lot have to become a playground for K - 3 grades? Then where do the vehicles go?	T41
Thought: Elementary bus access. Will all grades have the same bus drop off and loading area? What about K - 3 boot room and bus access?	T42
Thought: Improved pick up drop off areas for all ages. May require multiple areas for drop off.	T80
Thought: I am concerned about parking facilities for more students and staff	T106
Thought: Traffic Jams Will the children be safe and will there be adequate pick up area?	T145
Thought: Parking issues Parking for faculty and students is limited.	T151
Thought: Traffic Flow There is only one way in and one way out of the JCC 'loop'. Already, it is very busy with parents, students, busses, etc. without adding in the HPS. How can this be mitigated? It is unfair to ask the Town to build a road feeding onto Fox Lake Trail. That is Hanna's arterial route, allowing for a way to bypass the residential areas without stop signs and interruptions. This will become a traffic issue either way. If it traffic flow remains as is, there will certainly be problems for the school. If a road is allowed to collect onto Fox Lake Trail, it will certainly become problems for the Town.	T152
Thought: Parking Having children in both schools and seeing the lack of space for parking and pick up at JC and the amount of parents that pick their children up at the primary school is the reason I bring this up.	T155
Thought: Traffic is a concern. There is congestion currently with parents picking up their children. The primary school has more parents who pick up and drop off daily. Changes to bus loops and addition of places for parents to pick up their children will be needed	T197
Thought: The pick up and drop off loop road need to be redesigned. The loop where parents pick up and drop off there children is crowded and dangerous. It is extremely crowded for pickup and I truly fear for student safety. This loop needs to be widened significantly and if additional children from the primary school will be joining JCC, a second pickup drop off area should be added.	T205
Thought: Parking	T263

What are some things you are concerned about regarding the facility upgrades?

(continued)

I am concerned about parking facilities for more students and staff

G51

Will there be enough parking for staff, parents and our high school students?

Thought: Parking at Dismissal Times

T264

Parents currently park in the east loop as well as on the streets surrounding the bus loop to pick their children up after school. This area is already quite congested at the end of the day. I am very concerned about students' safety with the increase in traffic when the two schools combine.

Inability to support special needs

G59

Thought: Inability to support special needs

T23

Inclusion is a great idea, but it doesn't always work. Sometimes it is best for all kids concerned to have pull out programs. Sometimes it is best to have an aide in a room when there are six or eight or ten IPP students in a room. It may be beneficial to the students to create situations students of similar need and ability to work together.

Thought: A designated quiet room for students with special needs

T138

Special needs students need a quiet space where they can feel safe and away from the bustle of a busy classroom.

i think our school should bring in a cosmetics class for girls 7-10

G94

Thought: i think our school should bring in a cosmetics class for girls 7-10

T259

Keeping students with age appropriate peers

G61

Thought: Easing concerns of the children and of the parents in the K-3 grades.

T31

That the facility provides clear separations between the grades K-6, jr. high, and high school. (more so between the younger grades and the high schoolers. This does not mean that the high school or jr. high students cannot become "learning partners" with the younger grades. It means that the high school students will not normally be required to walk through the primary student area to get to their classes.

Thought: Student association

T55

What are some things you are concerned about regarding the facility upgrades?

(continued)

Keeping students with age appropriate peers

G61

I have seen from the suggested floor plans that the primary grades (K-3) are located by the shop which is and will be used by jr. and high school students (9-12). I've been told that students of the lower grades will have little to no association with the higher grades but how can this not happen when the only access to these classrooms are the same hallway. This is very intimidating for the primary students.

Thought: That the younger grades should be kept separate from the older grades.

T68

Children are easily influenced by what they see and hear therefore, I believe that kindergarden, elementary, junior high and high school (especially K-3) should be kept separate from each other inside and outside the school.

Thought: Separation of the lower grades from the upper grades.

T93

Thought: The younger grades

T104

As the younger elementary students come over they are intruduces to an area that can be shocking and scary with a lot of older students being around. As well some of these older students don't know how to be appropriate with their language and actions.

Thought: Segregation

T128

Can we section the elementary and secondary students to mitigate some of the issues from their interactions?

Thought: Keeping students with age appropriate peers

T135

Since we will have students from ECS - grade 12 I do have concerns with younger student being exposed to inappropriate language and behaviors from older students, and this needs to be addressed to protect the younger students.

Thought: Language

T157

Even though I have older and younger children it does concern me about some of the language the younger children will hear in the halls from the older groups. It has been nice having the primary school bubble to keep my little ones ears clear. Although I know he knows these words it nice that I don't have to worry about him hearing them daily and repeating them to his friends on the playground.

Thought: Separation of children

T190

Will the high school kids and younger children be separated and have their own spaces?

Thought: First thought -

T201

If the smaller children are going to be seperate from the older ones I don't think they should be able to have the same entrance or be in the same area. I hope they do have different places.

Thought: Separation of the youngest from the oldest

T209

What are some things you are concerned about regarding the facility upgrades?

(continued)

Keeping students with age appropriate peers

G61

I believe that the k-3 should be kept away from the older kids in the school. The language that is being used by the "young adults" everywhere we go is inappropriate to subject the youngsters to. I would also agree that 4-6 should also have a certain amount of segregation as well.

Thought: Positioning of primary grade classrooms

T211

The one plan I saw had the primary classrooms on the south end of the school- this seems to be a long way from the playground and field. Other than that I don't believe that classroom positioning in the school will affect instruction as long as primary grades are kept near one another.

Thought: Ages and Stages for Learning

T227

I think the biggest thing to keep in mind is that the stages of all children should be considered and that to some extent a wing or level system should be considered. Mental health is just as important and learning and teenagers going through puberty should not be around the younger kids.

Thought: I am concerned about having children from K-12 in one school

T228

Hopefully the school will be able to house all and will respect that k-4 should be far from 5-12

Thought: Space for the number of children now and in the future. A concern that the

T242

kindergarten children will be with the older kids.

Thought: separate areas for students,bigger bathrooms,upgraded library,foyer

T248

K-6 students should be on their own wing so there is little interaction with the older kids.They should have a separate entry into the school and separate washrooms.A foyer with skylights and eating or relaxing area should be built for the junior/highschool students.Parking for the parents who come to functions in the school needs to be expanded as well as the pick up drop off zone needs to be improved!!!The student parking lot should be paved.The south gym needs bleachers just like the north gym and the lighting needs to be improved.The change rooms need lockers and upgrading.The security in the school needs to be improved.Once classes begin,only one door should remain open to the public and whoever enters should have to sign in by going through office doors.

Thought: highschool aged students mixed in with elementary grade aged children-

T257

There was a reason to keep schools aged appropriate - uncontrolled influences on impressionable minds - separate entrances won't address this - as proven when this high school amalgamated with the junior high school

Loss of flexibility from a tight schedule

G62

Thought: Loss of flexibility

T18

What are some things you are concerned about regarding the facility upgrades?

(continued)

Loss of flexibility from a tight schedule

G62

If every space is scheduled for every class of every day, it will be impossible to find space for small group work or extra spaces for large class projects.

Maintain and add areas for students to have lunch and have down time.

G64

Thought: Common open area

T44

Will there be an open area for public forums, student presentations, booths displaying information, cookie sales at tournaments etc.?

Thought: Common areas

T221

It would be nice to have some spaces throughout the school for kids to hang out. The concession and library seem like good places for this. Lots of charging stations and comfy seating.

Thought: Maintain and add areas for students to have lunch and have down time.

T270

The newly renovated cafeteria is awesome and needs to stay and even expand. Smaller areas should be placed throughout the new facility for students to read, do homework or network with other students.

Making a new lunch time for the k to 3.

G65

Thought: Another dining area for the younger students.

T79

Thought: Making a new lunch time for the k to 3.

T252

Making sure technology is reliable, relevant and accessible

G66

Thought: Focus on optimal techno focal capabilities. Elimination of outdated

T8

As 21st century learners, there needs to be a focus on modernizing the internal technologies. There should be state of the art equipment built into the floors and walls of the new school ie. multiple accesses to plug ins, surround sound into each classroom, no external wires connected, etc

Thought: Wi Fi internet access. Computer usage.

T45

Will Wi Fi work better? Can it be filtered and controlled properly? The 21st century school will not need a computer lab, but will need printers and data storage.

Thought: The school has a computer lab which would benefit our students more with an

T77

What are some things you are concerned about regarding the facility upgrades?

(continued)

<p>Making sure technology is reliable, relevant and accessible</p> <p>instructor or IT person whom can assist them to utilize the equipment to its full capacity as it had been an upgrade which is not used to its potential. An opportunity to offer media development perhaps introduce a FM radio station which is developed by students</p>	G66
<p>Thought: Making sure technology is reliable and relevant.</p> <p>As technology is always changing and is so expensive to fix/maintain, I feel it is very important to equip facility with I.T. solutions that work and that are relevant for today and future use. Having the availability to upgrade easily. Keeping in mind: Can it be moved easily if required or utilized by more than one class (shared) to reduce expenses? Workstations/classrooms have access to charge electronic devices and fast internet.</p>	T83
<p>Thought: Technology to replace text books?</p> <p>Will class text books be available online instead of paper? My understanding is this is available and is cheaper than the outdated paper text books.</p>	T85
<p>Thought: that all students have equal access to new technology.</p>	T124
<p>Thought: Equipment</p> <p>Can we get newer equipment for some of the classes that otherwise can't afford them?</p>	T129
<p>Thought: Upgrade the intercome system</p>	T164
<p>Thought: Upgrade intercom system</p>	T169
<p>Thought: We should have better Computers.</p> <p>We should have better computers because sometimes when you are working, you barely hit the computer, and the computers turn off, and your work is gone.</p>	T176
<p>Thought: Small classes, addition of gym, smart boards in all the classrooms, full suz</p>	T212

<p>might be a good thing as kids do adjust to change better than adults do</p> <p>Thought: Third concern</p> <p>It's not really a concern but I feel also it might all be a good thing as kids do adjust to change better then adults do. That the move might be a good thing.</p>	G95 T217
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------

<p>Money is used towards bettering the school and not just for aesthetics.</p> <p>Thought: That there might be an unnecessary change.</p>	G67 T22
---------------------------------------------------------------------------------------------------------------------------------------------------------	------------

What are some things you are concerned about regarding the facility upgrades?

(continued)

Money is used towards bettering the school and not just for aesthetics. G67

examples being something like a security system upgrade (I personally think the one we have now is fine)

Thought: Money is used towards bettering the school and not just for aesthetics. T33

There is nothing wrong with adding a little architectural or design aesthetics, but that can be done with any money that is "left over" after the essential upgrades have been planned for.

Thought: Really think about placement and necessities. T76

On that note, since the remodeling is going to take place, please take the time to consider that it does not need all of the bells and whistles of a so called modern city school. I don't think that the school board should just take the money and make it look pretty, it should actually benefit thee students. I know how much money is being put into the renovations and I think that key elements such as bathrooms, the concession and the student parking lot should be addressed. The bathrooms are disgusting, and that is not because of our current janitorial.

Thought: Building does not need to be fancy. T82

Would like to see the building efficient, easy to clean and maintain. I would rather have money spent on simple, tried & tested instead of complicated, new and unknown.

Thought: Do not want to see electronic signs, fireplaces or other such items. T84

I believe funds should be spent on items directly related to teaching and learning and not wasted on frills.

Thought: spending money on things that do not need fixing right now T230

I understand we are going to be accommodating around 100 new students. Very young students who should be the first priority of what happens in the school. Every effort should be made to give them the very best education. Not just where they are educated but how it is done.

Negative impact on people's decision to relocate here G68

Thought: Puts limitations on the community to grow T117

Thought: Negative impact on people's decision to relocate here T118

Thought: That the elementary school closed... which is an obvious sign of deterioration of the community. T125

Thought: Fourth concern T218

What are some things you are concerned about regarding the facility upgrades?

(continued)

Negative impact on people's decision to relocate here

G68

How is closing down a school going to affect the town and people are you going to loose people it might not bring more people in either knowing there is only one school. This might not be good for the town.

No concerns

G93

Thought: Nothing

T10

Thought: nothing

T52

Thought: No concerns

T71

Thought: no concerns

T174

Not enough collaboration

G18

Thought: Modernization was forced on the community, options were not discussed.

T116

Thought: Not enough community representation. Too heavy administrative

T148

I don't believe it has been officially announced who the design team will be however, every time I have seen mention of the proposed 'team', there is no community at large representation. Someone who will look at the project from the prospective of the greater good of the community. NOT a parent. NOT a teacher. NOT a spouse of a teacher. Someone removed from the services provided at the institution but someone connected to the community.

Thought: Shutting out the community before any discussions can be held

T149

Don't pay lip service to the 'community'. Really discuss and look outside the box so any changes made will meet the needs for today and into the future. Are there opportunities to partner with other organizations? For example, clubs who may use space and pay rent in the evening while space is used by the school during the day. Advanced technical training, etc.

Thought: Collaboration

T195

There are other stakeholders in the community that also have interest in the quality of life of its members, including the youth; the existence of other facilities and structures in town should not be overlooked as possible venues. Let's work together to invest in the whole community.

Not knowing what the upgrades are

G71

Thought: Stress On Teachers

T17

What are some things you are concerned about regarding the facility upgrades?

(continued)

Not knowing what the upgrades are

G71

Uninformed community members and parents adding stress to administration, staff and students. It would be wise to keep these people in the loop at all times.

Thought: Communication

T66

Does PLRD do a newsletter anymore? Will it take the necessary steps to keep everyone informed each step of the way, even if this is a pain for them to do?

Thought: Public Relations

T67

Your PR now and during construction is vital. Figure out how to make it an "us" and not "them" situation.

Thought: Not knowing what the upgrades are

T123

Depending on the upgrade not knowing makes it hard to know what to be concerned about

Thought: Loss of what we already have

T140

Playground Design

G72

Thought: Outdoor equipment.

T144

The play equipment at JCC is for larger, older children. Will there be equipment for the younger kids to play on and will there be shelter.

Thought: Reduction in Green space

T153

Will there be a loss of green space north of JCC?

Thought: Playground

T158

I am not sure how new the playground is at the primary school but it seems to be perfect. The one at JC seems a little old and dated.

Thought: There need to be a new playground for smaller children.

T204

While the improvement to the playground a few years ago were wonderful and truly met the needs of the school at the time, that play ground is designed for preteen children. A new playground (not removal of the old!!!) for the use of elementary school children needs to be considered.

Thought: Playground Design

T262

I am concerned about having ample, age-appropriate equipment in a well-sheltered area for all the K-6 students to enjoy.

What are some things you are concerned about regarding the facility upgrades?

Security

G77

Thought: Security

T46

Currently both the primary and JC Charyk are open all the time. I here about security concerns with K - 3 and high school mixing. Maybe there should be security doors. My big problem with them is that there is no security now, so why the big panic? I'm more worried about outsiders than I am students.

Students might be in an unsafe environment.

G79

Thought: That the renovations will take place during the school year

T15

The interruption to instruction could have a serious impact on student's ability to learn and teacher ability to present continuous, uninterrupted instruction. Having to move, listen to construction, put up with dust, be required to move through construction debris and possibly dangerous construction areas. It could be difficult to maintain fire exits and escape routes for fire alarm exercises.

Thought: I am concerned about construction occurring around students in the school.

T107

Thought: It is going to take a long time and the school won't be safe to learn in.

T112

Thought: Students might be in an unsafe environment.

T113

Thought: How safe will the school be during construction?

T182

With all the work needing to be done, it won't just be worked on over the summer. Will my child have to attend school in a construction zone?

Thought: I am concerned how the actual work will affect those with allergies.

T229

asth

Teachers are ensured enough room.

G81

Thought: Teachers are ensured enough room.

T32

Teachers will be able to have ample space to store learning materials and resources. (a space to call their own. Not necessarily a classroom to call their own, but storage and a work area that is available and convenient for each teacher)

That all the grades (K - 12) will be considered.

G82

Thought: That all the grades (K - 12) will be considered.

T30

Not only will high school children require room for their optional classes, but grades K-3 will require classroom sizes that reflect the hands-on learning that goes on.

What are some things you are concerned about regarding the facility upgrades?

(continued)

That all the grades (K - 12) will be considered.

G82

Thought: Allowing senior high students to own space

T103

Both parents and kids don't want the young and old students to be together, and as a high school student, I would rather not have any young kids near the areas in which I do my work and enjoy my few minutes of downtime between classes

Thought: I want to see the high school students get equal opportunity as elementary.

T173

I know there will be a lot of considerations towards the implementation of design in regards to the younger students, as there needs to be. But I hope that the high school students will also get to see some innovation and have some chances to see some 'cool' things in their school that are implemented solely for them. The school needs to be created in an innovative manner for K-12, not just K-6.

Thought: Must be equal emphasis on what is good/workable for ALL students/grades

T250

It would be very easy for different stakeholders to get caught up in "fighting" for their own vision or wants. Leadership in this process must make very certain that everyone keeps their eye on the big picture, and on how to make this the best possible modernization for all students.

That pre-existing facilities won't be upgraded

G78

Thought: Distance learning classrooms?

T87

Are a few smaller classrooms planned that could be utilized for distant learning courses that would have the conference technology available. Thus allowing students to have access to courses not provided currently at J.C.C. EG: foreign language courses.

Thought: Shop time

T133

Thought: Science lab

T234

A well equipped and easy to use science lab would be welcomed, as the current arrangement has no fixed place for experiments.

Thought: Nice water fountains.

T239

Some of the water fountains are disgusting. The water is often warmish, it tastes strange, and frankly, some of them are so bad that I can't bring myself to drink out of them. It would be great if they were all upgraded to new fountains like the one by the grade 6 classrooms.

That the programming won't expand

G74

Thought: not enough options for highschool

T73

What are some things you are concerned about regarding the facility upgrades?

(continued)

That the programming won't expand

G74

Thought: Practices

T127

Are our classroom practices going to change to suit the facilities?

Thought: Programming won't expand. Skill set of existing teaching staff remains as

T150

It has been stated that a modernized school will provide better programming. I haven't heard or seen any examples of this. It is my understanding that the programming is structured around the skills of the teachers. Our programming has deteriorated over the years. For example, the flex class, while sold to parents as a useful tool, is in fact useless to students who are in an undisciplined age range. No music program. No drama program. In fact, no cultural exploration at all within the walls of JCC. Students in Sherwood Park, AB are taking Robotics courses in Jr. High. It is mandatory. They learn preliminary programming and robotics. Look how far ahead those students will be, compared to JCC students, when entering Post Secondary. This is only one example, there are many more.

The ability to blend the two school cultures into one.

G83

Thought: The amalgamation process

T65

What are the plans to amalgamate the two distinctly different staffs? Learn from your past. It has taken years and years to amalgamate the 4-6 staff into JCC. You do not want the K-3 staff to have to eventually retire before the coherent amalgamation of the staff happens.

Thought: The ability to blend the two school cultures into one.

T70

Too many group work classrooms

G43

Thought: Group work class Rooms

T186

I have been hearing talk of group areas, couches for class rooms, ect. While there are reasons for group work, as the parent of a introvert I am starting to get really annoyed with this concept. They say over a third of the population tends toward being introverts however we seem to need to ignore that. Studies are beginning to show that group open areas in the work place do not work. People even extroverts are distracted in those situations. Companies are beginning to allow for personal space and ideas, as they find group areas are to distracting. Please do not lean to much in this direction. I believe it can become a real negative to learning.

Washrooms and changerooms need an upgrade

G89

Thought: washrooms

T38

Are there going to be additional washrooms for all the students

What are some things you are concerned about regarding the facility upgrades?

(continued)

Washrooms and changerooms need an upgrade	G89
Thought: Washrooms and changerooms need an upgrade	T39
<p>The washrooms in the school are old & ugly, and some things don't work, like the feminine hygiene product dispensers. They're there, but they never seem to work. As well, the showers in the change-rooms are rarely used and often end up as places to throw garbage. The shower curtains are long gone, too. I think a good solution would be to have fewer, but nicer, shower stalls, because they are used sometimes and it is a useful facility for visiting sports teams.</p> <p>More private stalls in the change rooms would also be nice.</p>	
Thought: Bathrooms	T121
<p>Bathrooms close to young students or directly in ECS classrooms, when they got to go no time for a long trek.</p>	
Thought: less showers in change rooms more toilets in the the change rooms	T161
Thought: the high school bathrooms need alot of upgrading	T162
Thought: more toilets and less showers in the change rooms	T168
Thought: bathrooms and change rooms need improvement	T235
<p>They are ugly - if we're going to have a modern school, I want NICE bathrooms and change rooms. I feel that have so many showers is unnecessary, and hardly anyone uses them. They often become places to throw garbage, etc. I'd rather have three or four nice, clean showers.</p>	
Thought: Washrooms	T265
<p>The primary children will require washrooms that are "user friendly" (i.e., lower sinks, etc.).</p>	

Will it result in more area for the cafeteria?	G90
Thought: Concession Reno?	T88
<p>Will concession be renovated? If so I would like to see this integrated in some way with the actual home economics classes and curriculum? I believe there is value in having students plan, cook and budget for healthy meals.</p>	
Thought: Will the Cafeteria be open to the incoming primary grades?	T142
<p>Will there be room for all the students to get a hot lunch if desired.</p>	
Thought: Concession	T223
<p>In some ways this is the hub of the school and I hope it stays!</p>	
Thought: Will it result in more area for the cafeteria?	T244
<p>The current cafeteria is pretty crowded at lunch time</p>	

What are some things you are concerned about regarding the facility upgrades?

(continued)

Will it result in more area for the cafeteria?

G90

Thought: Enough space and storage for volunteers to continue the lunch program.

T253

Thought: Fridge and freezer space.

T254

Will there be enough room for the two FRW's and Project REACH Workers?

G92

Thought: Will there be enough room for the two FRW's and Project REACH Workers?

T100

These are very valuable programs and it would be sad to lose them just due to spacing issues. The FRW's both need their own offices and space to meet with students (which will be different due to the ages that they service) and REACH Workers need office space and a place to host after school, recess and lunch programs for students. These all need to be places that ensure the privacy of topics that might arise due to the nature of their jobs.

Will the school incorporate the Gymnastics club with the new upgrades?

G91

Thought: Will the school incorporate the Gymnastics club with the new upgrades?

T59

it would be nice to see that Hanna and the school board truly cares for its community and will try to find a way to incorporate the Hanna Gymnastics club into the school. Our club registers up to 50 kids a season and is the most popular sport for all children of all ages.

Will we get a nicer library

G10

Thought: library

T222

The library could use some computers and lots of printers for kids to use. I think a small meeting room or two that could be booked by students who want to meet to work together would be a great idea. Lots of charging stations. Good natural light.

Thought: An even nicer library

T240

Although the library is already decent, it would be great to have better organized bookshelves and comfortable seating -more of it. (But PLEASE don't go through the books and take out all the classics you think no one reads and get more nice, new copies of the classics - authors like Jane Austen and Alexandre Dumas - because some people really do read them.)

Thought: Library - do not get rid of old books simply because they are old

T241

The old books in the library are worth reading and shouldn't be discarded unless replaced with new copies.

Q2: What are some of the potential benefits of upgrading this facility?

Started: 28 Feb 2014 **Ended:** 31 Mar 2014

Priorities Summary

Overall rating - total number of stars assigned to that group of thoughts

Participant count - the number of people that assigned stars to that group of thoughts

Average rating - the average number of stars that was given to that group of thoughts. The overall rating divided by the participant count. Average Rating can indicate a small number of people are passionate about a particular subject. You will often see a group of thoughts with a higher average rating than a group higher in the list. This can indicate that the people that did add stars to that group felt it was very important.

	overall rating	participant count	average rating
Modernizing classrooms with technology	180	78	2.31
To develop a school community that is supportive and encouraging.	151	73	2.07

Parent Councils would merge	34	21	1.62
"The Benches" - can get rid of a congregation point for students avoiding class	28	18	1.56
will be nice to have a change	28	14	2.00
I can't think of one	25	8	3.12

What are some of the potential benefits of upgrading this facility?

A draw for the community. **G3**

Thought: benefits to community and students **T13**
 An upgrade to a modern school will provide better learning opportunities for students, hopefully in a broader range of subjects. Having a modern, progressive school adds to our community by drawing new residents to our town

Thought: Modernization is essential, it does draw people, new families etc. Proper upkeep is just as important. **T20**

Thought: Any upgrades on a facility are beneficial. **T37**
 If done properly hopefully it can attract more families to our area.

Thought: Helping the look of our school **T103**
 It might help to make our society, school, and community look a lot newer and up-to-date. Our school seems a little bit old other than the cafeteria but other than that I think it's a good idea overall

Thought: A draw for the community. **T110**
 People looking to move to Hanna will be excited about a brand new facility.

Thought: Creating a school the community can be proud of. **T144**
 Modern school that will attract families and professional instructors. The facility will be the largest in the division!

A fresh looking up to date school can help keep the kids engaged **G4**

Thought: Having a school that everyone can be proud of. **T19**
 The layout of rooms and the aesthetic qualities within the school are beneficial towards the students and the teachers school pride. Students are more likely to want to come to school, if they have a school that feels welcoming and is comfortable to learn in. Teachers want a school that works with their teaching styles and their curriculums. The upgrades should play a part in the learning and teaching environment. (of course, also includes the quality of the teaching itself and the curriculum)

Thought: Maybe kids might enjoy going to school. **T86**

Thought: Potential to Turn Around the Downward Trend High School Achievement **T101**

What are some of the potential benefits of upgrading this facility?

(continued)

A fresh looking up to date school can help keep the kids engaged

G4

Hopefully a fresh start will motivate all involved to turn this trend around. Many in the community have been very worried about the idea of young children losing their school. I am more concerned as a parent looking at the beginning of highschool for 3 children and what is going to happen to their future chance of qualifying for university, college, ect. or if it will end up being less of an option for them then it was for me. While my kids do pretty well I suspect, after hearing stories from older relatives, that may not be enough. Kids that had a chance for scholarships before coming here. It is not just a matter of making up a bad course it affects everything as well as their attitude about whether they can achieve their goals.

Thought: There is such a opportunity to have an amazing school.

T109

A new modern facility will be able to meet 21 century learning. We have the opportunity to update the school so we can change things to be more flexible and meet students needs in different ways.

Thought: Increased quality of education

T111

The Hanna school could be a leader by educating our children relevantly; providing context that inspires engagement and creativity, settings for knowledge to grow

Thought: A fresh looking up to date school can help keep the kids engaged

T124

Thought: teacher/students will feel better with a newer facility

T129

All teachers in Hanna under one roof

G10

Thought: All teachers in Hanna under one roof

T63

A new building offers new learning opportunities and options

G5

Thought: Focus shifts to a new learning style with new style of school

T2

The education system is slightly outdated in its rigid approach. This is an optimal time to open up classrooms and allow for collaborative experiences between classes and teachers. Rather than each classroom being shut off from others it should be a transparent representation of how we want society to be modeled.

Thought: Excellent facility

T5

This is an opportunity for the school in Hanna to be an excellent school offering students everything they need to learn in their own way as well as great options that are not currently available.

Thought: The school will have more rooms to have different events/classes.

T6

Thought: New Options for Students

T8

What are some of the potential benefits of upgrading this facility?

(continued)

<p>A new building offers new learning opportunities and options</p> <p>New spaces and upgrades will allow for new academic and athletic opportunities.</p>	G5
<p>Thought: benefits to community and students</p> <p>An upgrade to a modern school will provide better learning opportunities for students, hopefully in a broader range of subjects. Having a modern, progressive school adds to our community by drawing new residents to our town</p>	T13
<p>Thought: New choices</p> <p>We will have new facilities and new choices and options for students.</p>	T14
<p>Thought: Get some money to upgrade Industrial Arts, Fine Arts capabilities.</p> <p>If this is approached correctly, money can be allocated to put some Fine Arts, performing arts, industrial arts facilities in place for the school and community.</p>	T24
<p>Thought: Provide an environment 2nd to none.</p> <p>The fact that Hanna is a small community should not mean that our students do not have access to the best education possible. An upgrade to the facility might allow for better options to be offered to the students of Hanna rather than just the basic academic courses.</p>	T30
<p>Thought: More focus on art</p> <p>the school could have plays.</p>	T32
<p>Thought: Opportunity</p> <p>I think that you have opened up the best thing that could happen to J.C.C. The school is dated. There are heating issues in the winter, no air conditioning in the summer. The piping is old and very noisy, quiet distracting actually. The lack of music and drama classes miss a wonderful opportunity to teach students in a way that fits them. I think a lot of the school could be saved though and I'm curious as to where equipment and large furniture will go.</p>	T50
<p>Thought: There is no existing fine arts program in place.</p> <p>Numerous students are amazing actors but do not have an opportunity to explore their capabilities within school. An auditorium is necessary.</p>	T57
<p>Thought: A new building offers new learning opportunities</p> <p>With new technology, students will be able to learn in new ways, but along with this the teachers can't be stuck in the past, and must be dedicated to put in the time and effort to make these changes effective.</p>	T58
<p>Thought: Improved learning opportunities!</p> <p>As with any upgrade, it is hoped that opportunities for student learning and activities increase improve with the upgrades.</p>	T67
<p>Thought: Opportunity to add a music room & expand the shop area to provide more than</p>	T69

What are some of the potential benefits of upgrading this facility?

(continued)

<p>A new building offers new learning opportunities and options what is available currently.</p>	G5
<p>Thought: More class options Drama, music, dance, hockey, maybe we could become a composite school to offer more to our students.</p>	T72
<p>Thought: that our young people will graduate with the knowledge of whats expected of them in the work force of the future</p>	T73
<p>Thought: Hopefully they will be able to offer more academically</p>	T98
<p>Thought: Students will have a better opportunity to have more options and a more comfortable place to work.</p>	T100
<p>Thought: More options for students Teachers will be able to utilize all talents and provide more options to schools. i.e. drama, music</p>	T104
<p>Thought: More opportunity for students and work experience</p>	T106
<p>Thought: Upgrades are beneficial to all the students The money should be spent wisely and the present student body and future opportunities need to be considered as well as the use of technology in the school.</p>	T119

<p>A new modern facility for all.</p>	G7
<p>Thought: Modern Facility with upgrades to equipment. Current facilities will be modernized and upgraded. The school will have a new look and feel.</p>	T12
<p>Thought: Being modern and upgraded</p>	T16
<p>Thought: upgrading is always a positive any facility over years needs upgrades to keep up with modernization, safety and health needs</p>	T21
<p>Thought: A new modern facility for all.</p>	T27
<p>Thought: Modernization Finally getting what the school and community deserves and has been long over due.</p>	T33
<p>Thought: Fresh paint Upgrades that have been long over due</p>	T34
<p>Thought: Modern building for all students in Hanna</p>	T40

What are some of the potential benefits of upgrading this facility?

(continued)

<p>A new modern facility for all.</p> <p>This process opens the door for grants that are available to modernize our school. Not an option to modernize both schools due to the age of the Hanna Primary school, so upgrading/modernizing JCC makes sense so that all the kids can have a "new" school.</p>	G7
<p>Thought: things will be new</p>	T43
<p>Thought: Newer facility</p> <p>Modernizing our current facility to a newer facility.</p>	T46
<p>Thought: Modernizing the facilities.</p>	T49
<p>Thought: Opportunity for top notch facility</p> <p>This can only be achieved if the planning process is not rushed and all ideas are considered.</p>	T56
<p>Thought: Brand new school</p>	T62
<p>Thought: The school will look nice and will be better.</p>	T65
<p>Thought: Benefits for this upgrade: It will provide an opportunity to modernize the school & bring upgrades which the school has done without for many years such as adequate heating & cooling system.</p>	T68
<p>Thought: all students will be in one area and the upgrades will bring the school up to date</p>	T81
<p>Thought: It would be an opportunity to modernize some very out dated rooms</p> <p>Self explanatory.</p>	T84
<p>Thought: The school would be at lot nicer</p>	T91
<p>Thought: Will be a modern facility, energy efficient, tech savvy school.</p> <p>Will be able to handle all of the requirements of 21st century learning.</p>	T92
<p>Thought: The benefits of upgrading the school are endless.</p> <p>There are benefits to all grades of students, and for staff, to upgrading the facility. Things will be modernized and refreshed, and new innovations/technology/spaces, etc. will allow students to become even more collaborative and mature students.</p>	T93
<p>Thought: we can have better and newer equipment and school</p>	T94
<p>Thought: Potential benefits</p> <p>Better everything in general</p>	T95
<p>Thought: Modernizing the school.</p>	T99

What are some of the potential benefits of upgrading this facility?

(continued)

A new modern facility for all. G7
 Updating the facilities having a newer better school.

Thought: A new facility for our children. T113
 Hanna is long overdue to have modernization or capital funding put into our schools. Upgrades to our facility will hopefully enable our students some advantages in technology integration, resource availability , modernized equipment and supplies for the school.

Thought: Updated facilities T114

Thought: Upgraded to 20th century T120

Thought: Hopefully we will get a modern facility if it will be done right. There is a lot of money involved, hopefully it will be put to good use. T123

Thought: Improvements of washrooms, gymnasiums and classrooms T126

Thought: An updated facility T130
 Both of Hanna's schools have been in need of some serious upgrades for quite some time. Even though we will be left with only one facility, let's finally get this work done!!

Thought: a nicer building T136

Thought: Needs will be acquired. T142
 Teachers and staff will receive tools or spaces that will make their job easier.

Appropriate area/classrooms for grades K-3. G11

Thought: Appropriate area/classrooms for grades K-3. T18
 With these upgrades, the grade K-3's will have an area that is suited for their learning styles and for their size. (e.g. possible bathrooms with lower sinks, lockers that small children can reach, etc.) Children within these younger grades, especially kindergarten, require more hands-on activities and "play-based" opportunities to learn. Their classrooms need to be able to accommodate these types of curriculums.

Become a hub for the community G20

Thought: Hub For Community T7
 Great updated space for various community members to get together.
 Amazing opportunities for after school programs, and networking.

What are some of the potential benefits of upgrading this facility?

(continued)

Become a hub for the community	G20
Thought: Like having everyone together.	T28
Thought: Having all the kids being in one school from start to finish. Having all kids in one school would create an excellent opportunity to develop school culture. Peer teaching groups, reading programs, work experience opportunities to name a few things that would have intermixing of grades in a manner to help one another and it would dispell this ridiculous rumours that the older kids would be picking on the little kids.	T83
Thought: Community connection This process is an opportunity to include community and potentially create the school that is the hub - we have silos in our town, this one could be dismantled and become the new model of 'a village raising a child'	T112
Thought: K-12 school creates a sense of community I believe that a k-12 school creates a sense of community among both the students and teachers. I think it will help to bring everyone together and stop some of the rivalry and misunderstandings between staff and parents of the two schools. The amalgamation will provide the opportunity for all students, staff and community to better understand each other, work together and create a sense of community.	T116
Thought: We'll all be in this together.	T132

Building an efficient and cost effective facility.	G14
Thought: Efficiency Joining the schools will allow for overlap of some equipment and services and increase the buying leverage in some areas.	T10
Thought: Probably the cost savings to the school board.	T38
Thought: Reduce budget costs By eliminating the costs involved with running Hanna Primary (ie. upgrades to the boiler, windows, roofing issues, etc) this will make better use of funds available to have our kids in a safe, healthy environment.	T41
Thought: Cost efficient Only have one school to maintain and less land taxes eventually.	T47
Thought: Less maintenance on one facility over two facilities in the same community	T60
Thought: Save the school division money	T118

What are some of the potential benefits of upgrading this facility?

(continued)

Building an efficient and cost effective facility. G14
 Obviously operating one facility will be more cost effective for PLRD in the long run and the reality is that we are not going to keep getting more money for schools- this is smart operating in my mind.

Thought: Reduced operating costs T133

Thought: Hopefully to reduce operational costs. T134

Thought: Building an efficient and cost effective facility. T145
 Having one facility will be cost effective and safe on operating costs going forward.

Centralizing the schools. G16

Thought: Having one school in Hanna is nice for everyone. T15
 Convenient

Thought: One stop bussing T23
 The busses won't have to travel across town to drop off K - 3 versus 4 - 12 grade students. The downside is that our children won't get a ride from the primary to JC Charyk in the morning.

Thought: Centralization T39
 All students within the town will be in one facility. Can more easily utilize resources to benefit the kids. For example, every year the Grade 3's walk over to JCC for a mentoring class with the home economics kids. If the kids are in the same building, this will make these types of things more readily possible. JCC is also closer to the pool and the skating rink. If Grades k-3 are in JCC facility, they will have better access (possibly more) to those type of functions.

Thought: That there will be one school T44

Thought: Centralizing the schools. T48

Thought: Having all students at one location for bussing. T85
 With all students at one location, there should be fewer instances of students missing the bus.

Thought: less bus issues T88
 Busses will be picking up children from one central location.

Thought: It would benefit us because... T96
 It will be saving us lots of time

What are some of the potential benefits of upgrading this facility?

Collaboration and consistency in programming G19

Thought: Program consistency T9

A well organized, professionally handled and properly funded professional development plan will ensure that students from kindergarten through grade 12 will have a consistent, scaffolded and relevant education experience.

Thought: Shared Learning T71

Grade groups meeting and learning new outcomes, or different grade levels mentoring or doing projects together.

Thought: Knowledge sharing. T87

Sharing of work experience between primary and high school aged students.
Also, the sharing of expertise of staff from both primary school and high school sharing talents and resources.

Thought: Opportunity for learning collaboration from K-12 T131

Teachers will be able to collaborate across a wide range of ages and grades.

Thought: Collaboration T137

Teachers will be able to collaborate with one another to benefit their students as well as their own teaching practices.

Thought: Consistency T139

Having all the students and teachers in the same building can allow for greater consistency in expectations and programming.

Create comfortable areas for students to work or meet G2

Thought: 21st Century approach T78

We can create areas more comfortable for students to work or meet *if* they're relatively easy to monitor.

Getting new desks and chairs would be nice G33

Thought: Getting new desks and chairs would be nice. So that we won't be mortified T140

of our chairs collapsing underneath of us. Other than that, having a K-12 school isn't fair and makes me want to move even more.

What are some of the potential benefits of upgrading this facility?

Host larger school events G24
Thought: Larger School Events T52
 We would be able to have more family events after school for all ages

I can't think of one G49
Thought: Nothing T4
Thought: I don't see any T59
Thought: I can't think of one T74

It has potential for improvement but is it a temporary fix. G50
Thought: It has potential for improvement but is it a temporary fix. T45
 When doing renovations consideration to longevity and energy consumption has to be assessed. A new building maybe the better choice for long term gain.

Lower cost than to build a new facility. G26
Thought: Lower cost than to build a new facility. T97

Mentoring of younger students by older students G27
Thought: Mentoring of younger students by older students T54
Thought: All students are in the same building and siblings can be together. T122
 The older students can be mentors to the younger students and all can benefit.
Thought: Student Interaction T138
 Older students will be able to work with the younger students.

Modernizing classrooms with technology G28
Thought: being able to share technology and resources through one facility T1

What are some of the potential benefits of upgrading this facility?

(continued)

<p>Modernizing classrooms with technology</p> <p>Hopefully with all grades in one school there will be more resources available to all teachers and classes. Technology should be shared as well as programs from speech therapists, project REACH, social workers, etc. Without losing staff as they will look after the same amount of children in total.</p>	G28
<p>Thought: New technology</p> <p>Allows for greater integration of technological advances</p>	T3
<p>Thought: Learning and technology are always changing.</p> <p>Wonderful when these needs can be met.</p>	T26
<p>Thought: New and updated equipment that works reliably.</p>	T61
<p>Thought: Classroom Improvements</p> <p>We can use this as a way to improve equipment in individual classrooms and give students what they need to learn better.</p>	T79
<p>Thought: Technology</p> <p>Ability to draw in the newest technologies into the classroom i.e mobil devices, google glass etc</p>	T105
<p>Thought: To give our students, staff and community the most up to date school system</p> <p>With the best equipment, supplies and technology.</p>	T107
<p>Thought: Opportunity for new technology and resources</p>	T117
<p>Thought: Modernizing classrooms with technology and furniture.</p> <p>Creating an environment for engaged learning and teaching utilizing the latest in technology while in a comfortable setting.</p>	T143

<p>Opportunity for work experience with younger aged students</p>	G40
<p>Thought: Opportunity for work experience with younger aged students</p>	T55

<p>Parent Councils would merge</p>	G34
<p>Thought: Parent Councils would merge</p> <p>Coordination of parent council planned events and meetings would be better and hopefully communication and participation as well.</p>	T53

What are some of the potential benefits of upgrading this facility?

Past facility concerns will be resolved. G35

Thought: Past facility concerns will be resolved. T17

I'm not sure if there are have been any concerns in the past over any area in J.C. Charyk. Maybe it's a lack of bathroom space, the thought of moving the Home Ec. room to the high school area, whatever. If so, this is the time to change it.

Thought: Correct past mistakes. T29

There were a few mistakes made in the past as far as losing gym space because they forgot to allow for lockers. These will be corrected. If hallway space is considered teaching area, then the hallways can be reduced, and added to classrooms.

Thought: Safer T35

Bringing the school up to safety codes

Thought: Building will be brought up to code. T51

Thought: Modernizing washrooms T82

It will be great to have modernized washrooms, the majority of the bathrooms at JCC need to be completely redone. A lot of the tiling/grout needs to be removed and replaced. Automatic flusher on the toilets will ensure regular flushing as students forget or neglect to do this, which can also help with the reduction of the spread of infections. Automatic water/soap/paper dispensers would also help in the reduction of infections spreading throughout the students and staff.

Thought: Heating and ventilation T115

I have heard from my children attending jcc of the lack of heat in the winter, and cooling and ventilation in the spring and fall. Maybe with the work going on, the hvac system can be updated to make it habitable.

pride of ownership in the new school G36

Thought: Pride T36

Pride of ownership, pride to share this facility with community

Thought: We would have better comments and more people would be pleased T89

Thought: We would have better comments T90

Reorganize and clean out storage space G37

Thought: Reorganizing space T75

A lot of potential square footage is being wasted at the moment due to the layout of the building.

What are some of the potential benefits of upgrading this facility?

(continued)

Reorganize and clean out storage space

G37

Thought: Cleaning storage space

T77

We can use this opportunity to go through our rooms and storage areas in order to remove equipment that's no longer necessary and reorganize whatever is left behind.

Room for a park or something once the primary school is taken down

G32

Thought: More space.

T141

Once the Primary School is taken down there will be room for a park or something.

"The Benches" - can get rid of a congregation point for students avoiding class

G1

Thought: "The Benches"

T76

We can get rid of a congregation point for students trying to avoid class.

The primary children will be in a school that is safe and new.

G42

Thought: Save the school district having to maintain old primary school

T22

The old primary school is close to being condemned. The cost of maintenance and upgrades is prohibitive.

Thought: The primary children will be in a school that is safe and new.

T108

The current primary school is old and even partly condemned. I am excited for. My child to attend a facility that is new and safe!

To develop a school community that is supportive and encouraging.

G44

Thought: Student Body Spirit

T102

We have been in smaller schools where it was a pleasure to see much older kids helping out with the younger ones, just because they are together more. Hopefully that happens here.

Thought: To develop a school community that is supportive and encouraging. To

T128

develop mentoring in child to child, and adult to child.

What are some of the potential benefits of upgrading this facility?

upgrading the smaller gym would benefit gymnastics

G45

Thought: upgrading the smaller gym would benefit gymnastics

T31

doing this would benefit the elementary kids as the equipment is there to use and Hanna gymnastics club volunteers one day a year to all the elementary kids to have a full day of gymnastics to all the grades of elementary this could also benefit Jr.high and High school students

Thought: better gym

T135

Utilization of specialists for a higher level of instruction

G46

Thought: Utilization of specialists

T11

The opportunity to have specialist teachers work with students at a larger spread of grade levels will only provide for a higher level of instruction.

Weight room

G47

Thought: Wight Room

T25

I don't want our school to have no wight room

Thought: Weight room

T127

We will have somewhere to train for our sports and get into shape

will be nice to have a change

G48

Thought: will be nice to have a chage

T80

Q3: What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

Started: 28 Feb 2014 **Ended:** 31 Mar 2014

Priorities Summary

Overall rating - total number of stars assigned to that group of thoughts

Participant count - the number of people that assigned stars to that group of thoughts

Average rating - the average number of stars that was given to that group of thoughts. The overall rating divided by the participant count. Average Rating can indicate a small number of people are passionate about a particular subject. You will often see a group of thoughts with a higher average rating than a group higher in the list. This can indicate that the people that did add stars to that group felt it was very important.

	overall rating	participant count	average rating
A good education for the students.	195	84	2.32
Classrooms/learning spaces that meet the needs of the students and teachers	172	81	2.12
Expansion of PE facilities and resources	118	62	1.90
Updated and expanded curriculum	104	56	1.86
A great learning environment that is safe!	103	54	1.91
Separate facilities for high school and elementary	93	49	1.90
Expansion of art facilities	92	50	1.84
A welcoming and caring facility.	88	55	1.60
Improved facilities and resources for staff	88	57	1.54
A safe environment for students to work in during construction.	84	54	1.56
All HPS staff keep their jobs in the transfer	81	32	2.53
A modernized facility!!	81	44	1.84
Attraction of a better grade of teachers - current crop questionable-	80	34	2.35
Adequate parking for staff/students/parents.	78	51	1.53
Build and expand on outdoor spaces	78	50	1.56
A designated space for all students to eat their lunch	77	42	1.83
Better access to modern teaching practices and facilities	76	49	1.55
Better science lab availability for junior high students	75	47	1.60
Make green spaces in the school	75	43	1.74

Q3: What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

	overall rating	participant count	average rating
More community use and community feel.	71	38	1.87
Pride in our school	67	48	1.40
input in the design and placement of different areas	66	43	1.53
Work without unnecessary distractions	64	40	1.60
Increased amount of common areas/ learning centers	54	40	1.35
have a big school aquarium	53	22	2.41
Gymnastics	44	21	2.10
Loft in classrooms and library for reading groups	41	24	1.71
Individual and community achievement.	35	25	1.40
Alcohol and Drug Abuse programming	30	20	1.50

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

Adequate parking for staff/students/parents. G23

Thought: Adequate parking for staff/students/parents. T10
 At times currently parking is an issue at J.C.C. new space will need to be created.

Thought: Improve student parking lot T144
 Students here have wanted this for years, and now is the chance. Pave the student parking lot, and improve traffic flow by having a designated entrance and exit. For example, students could enter off 7th ave only, and then leave out 8th ave (which is now the entrance/exit)

A designated space for all students to eat their lunch G6

Thought: Larger concession area. T58
 The current facility is not large enough and not effective enough. There are a great number of students and it is not nearly efficient enough to effectively service the increased number of students.

Thought: New to Hanna, but notice cafeteria seems small. T66

Thought: An elementary lunch room so they don't eat at their desks T84

Thought: A designated space for all students to eat their lunch T117
 Students need a designated area that is big enough for them all to have a place to eat their lunch.

A good education for the students. G8

Thought: Having all of their educational needs met. T19
 The upgrades need to provide opportunity for all children to become successful. When they graduate, will they have all of the skills needed to enter the "real world" and post-secondary education. The school board needs to keep in mind, that although it is desirable for all graduating J.C. Charyk students to go on to some type of post-secondary education, realistically, not all students will. What needs to be put in place to allow for these students to succeed in life as well? Is it more options for jr. high and high school students? Is it more occasions to work on "life skills"? How can the upgrades help those students who are not going to go on to post-secondary schools? Do the library and the gyms, and the materials and equipment within them, meet the needs of all the grades?

Thought: The advanced learning would not take away from the basics. T23

Thought: Education T29

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

<p>A good education for the students.</p> <p>Our children deserve the best education as compared to other top rated schools. There is no reason we can not give them that. These students will be running our town, province, country and making decisions on everyone's behalf and we need to educate for that.</p>	<p>G8</p>
<p>Thought: Quality Education</p> <p>I am hoping that with the money being spent to complete this amalgamation that we don't lose funds for education. We still need a good quality of education for our children. Even if there are two separate pools of funding, sometimes one gets "borrowed" from to help out another.</p>	<p>T40</p>
<p>Thought: A good education for the students.</p>	<p>T43</p>
<p>Thought: Teachers will have sufficient resources to provide high quality education.</p>	<p>T49</p>
<p>Thought: Increased learning opportunity</p> <p>In the end, it comes down to the success of the students, and an upgraded school will allow for that success</p>	<p>T59</p>
<p>Thought: Education created by Canadians, and relevant to Canadians</p>	<p>T70</p>
<p>Thought: Quality education with a good variety of opportunities.</p>	<p>T192</p>

<p>A great learning environment that is safe!</p>	<p>G9</p>
<p>Thought: Safe Environment</p> <p>I would like to see that the students, especially the younger students, feel safe being in a school with older students.</p>	<p>T39</p>
<p>Thought: The feeling of safety for the students</p>	<p>T42</p>
<p>Thought: Safe environment for all students.</p>	<p>T47</p>
<p>Thought: Doors that lock from the inside for lockdown.</p>	<p>T81</p>
<p>Thought: Positive experiences</p> <ul style="list-style-type: none"> -safe environment where younger students have no fear of being bullied -that HPS staff feel that they are included/welcomed 	<p>T131</p>
<p>Thought: use bright colours in the school</p> <p>Liven up the school with bright, cheery, fun colours to help lift the moods of people. Winters are long and the school could be a place of cheer.</p>	<p>T136</p>
<p>Thought: Positive School Life</p>	<p>T156</p>

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

A great learning environment that is safe!

G9

This does not mean a lot of buzz / fluffy words. Something does need to change. I have seen positive signs this year with our new principal though I fear it is going to take more time. Maybe modernization will help everyone get on board with changing for the positive.

Thought: A Great learning environment that is safe!

T164

Entry into the school that is supervised by the front office for viewing and access of people coming and going from the school. Joint library facility with longer and more accessible hours that includes a coffee bar. Proper science/food labs that are functional and have the proper space for safety. Proper lighting and heat loss reduction around windows and doors. Fine Arts Auditorium. Gyms that are not divided but allow full access of proper sized gym space for students to utilize. Better weight and exercise space with good equipment. Safe access for student drop off and pick-up that is less congestive than it already is. Lounging area for students.

Thought: Safety

T173

There are too many swept under the rug bullying issues in this community, by integrating all ages will this increase?

Thought: Cameras and monitors throughout the school for security reasons

T175

Between drugs, bullying and sexual activity I feel the children and families will feel safer knowing all is being monitored. This includes within the classrooms

Thought: A Positive and Cohesive Learning Environment

T195

This can be a wonderful place where everyone works and learns together in one place.

Alcohol and Drug Abuse programming

G25

Thought: Alcohol and Drug Abuse

T174

We know that this is also a huge issue in this community and within JC Charyk, there needs to be more awareness around this with all ages in the school.

All HPS staff keep their jobs in the transfer

G28

Thought: All HPS staff keep their jobs in the transfer

T14

A modernized facility!!

G12

Thought: Having some good, new rooms.

T5

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

A modernized facility!!	G12
Having an auditorium, a few nice gyms for holding different sports events, and a large Home Ec Room.	
Thought: Theater, electronic utilization and a comfortable learning environment.	T37
Thought: Repaired Facilities	T75
Some physical problems, such as insulation, internet access, and plumbing can be fixed through this process.	
Thought: Lots of power outlets	T85
Thought: windows that open but keep out the drafts	T96
Thought: blinds that keep out the sun	T97
Thought: heat and cooling that you could adjust	T99
Thought: No carpet!!!!!!	T101
Thought: storage rooms outside the classroom for big stuff or bins etc.	T102
Thought: recycle the water from the roof for the gardens lawn and trees	T106
Thought: hand dryers in bathroom – no paper towels	T112
Thought: more washrooms for staff and student	T113
Thought: More windows with better window coverings	T137
window coverings need to be able to actually block out light and darken a room if necessary	
Thought: auto-working taps/hot air dryers in all bathrooms	T145
Thought: Up to date classroom, equipment, separate play grounds. Cafeteria and home echo room together.	T162
Thought: Modern spaces used to there full use.	T179
Thought: A modernized facility!!	T185
Let's think beyond new paint and flooring! How can this building be configured to meet everyone's needs?	

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

A safe environment for students to work in during construction.

G16

Thought: A safe environment for students to work in during construction.

T60

Attraction of a better grade of teachers - current crop questionable-

G31

Thought: Attraction of a better grade of teachers - current crop questionable-

T191

A welcoming and caring facility.

G21

Thought: Peer Mentorship

T3

PEER MENTORSHIP!!!!!!!!!!!!!!

Peer mentorship between younger and older students is such an amazing thing. It creates relationships, and increases inclusion throughout the school. As a grade 12 student, I would LOVE to have a younger partner that I could play in the gym with, or help with their school work. It would allow for older students to be role models and strengthen qualities such as leadership and younger students to admire them. This would be something that could potentially be done once a week during flex?

Thought: A better sense of community

T8

There is certainly a sense of "us" and "them" in the community. When the last amalgamation took place in 1994, there were concerns about the young students being around older students. The concerns were unfounded. Entering the merger with the right attitude should alleviate these concerns, as long as people approach things with a positive attitude.

Thought: A welcoming and caring facility.

T17

The physical attributes of a building can affect how students, teachers, parents, and visitors feel welcomed. All grades (K-12) should feel that the upgrades have been made with their age-group in mind. The grade one students need to feel like their area has been designed with their particular needs in mind, and the grade 11 students need to feel that the school has their particular needs in mind. By providing upgrades that are made with all grades in mind, the students will feel as if the school board really does care about them and their learning. The needs of teachers have to be included within the upgrades as well. Likewise, parents and community members need to see a school that works for both the teachers and the students of all the grades.

Thought: The teachers and support staff to be one big family.

T20

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

A welcoming and caring facility.

G21

If J.C. Charyk is to include grades K-12, all the teachers and teacher's aides need to feel like they belong. Of course, their will be a natural split amongst the younger grades, the jr. highs, and the high school teachers, but each of these staff members needs to be recognized for the part they play within each child's education. These staff members need classrooms that meet their teaching needs; storage or an area to be able to keep their personal teaching materials, as well as school owned materials and textbooks; a place where they can plan for the next day or the next week; and an area where they can go to relax and mingle with the other staff members during breaks.

Thought: A community feeling

T24

Thought: Protective family atmosphere

T32

I would like to see cooperation from the community as a whole, as well as staff and students, to achieve a friendly, welcoming atmosphere within the school for all students and parents. I feel if this is handled properly it could lead to a less intimidating environment for the young grades with a more protective attitude from the older grades which may lead to a more united front, in turn helping to alleviate some bullying issues.

Thought: How well a grade 12 student will get along with a grade 1 student.

T38

Thought: They will be in a nice school and will like to learn.

T65

Thought: Happiness.

T118

Thought: Great interaction between all ages.

T120

There is a thought that some don't want their little kids in the same facility with older kids because they worry about bullying, bad influence, etc. Lets enable the older kids to show what they can do, lets put this negative idea to rest and let the kids prove that they are and can be a good influence to the smaller kids.

Thought: Participation

T124

If there is anyway for the kids to leave a part of themselves, help build, put their hand in the cement or anything like that will give them pride and something to brag to future generations about their part in creating this new part of Hanna.

Thought: wider hallways would make the school seem more open

T146

Thought: A school to be proud of.

T155

Thought: Bullying awareness

T158

I want everyone in that school to help one another. I want bullying to be put to the minimum and I want the school to be somewhere people feel safe and "want" to go.

Thought: A sense of community

T168

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

A welcoming and caring facility.

G21

I hope that by bringing all staff and students together it will create a sense of community and shared responsibility. I see this new school as a way to build better relationships between our older and younger students and provide more leadership opportunities for older students.

Thought: Safe and welcoming space

T171

I hope that the new facility will be safe and welcoming for everyone.

Thought: Community spirit from all age groups, older students mentoring and helping

T181

The younger kids

Thought: The student matters, to encourage their growth within the community.

T183

Better access to modern teaching practices and facilities

G33

Thought: Cutting edge technology

T7

If things are done properly and foresight is exercised, there should be excellent opportunity for accessing technology, distant learning, collaborative activities with other schools and making use of the World Wide Web. The worst thing that could happen is building a school with all the potential in the world, but not enough bandwidth, access points, IT support and equipment to allow students to access it.

Thought: Excellent video conferencing facilities to accommodate learning for all

T15

ages with unlimited offerings of course material. Many students experience difficult learning atmospheres and sometime conflicts with teachers. An opportunity to make a choice without the added cost of travelling out of town to do this could be very beneficial and keep our families in town rather than spending money and time elsewhere.

Thought: Making the facility to accomandate the future

T36

Thought: Technology

T45

I think we could really take advantage of technological advances. This would mean incorporating ALL STAFF to be using the same programs.

Thought: Current Generation Technology

T74

Having students work with equipment that is more indicative of what businesses and organizations utilize would be a great learning experience.

Thought: Quality computers for every student – dockers in class

T88

Thought: Enough computers for all students to write their PAT's and diplomas

T89

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Better access to modern teaching practices and facilities	G33
Thought: Lots of band width for video streaming in all parts of the school	T90
Thought: Built in storage in the classroom with doors.	T93
Thought: smart boards interactive white boards	T95
Thought: all classrooms should have Apple TV (which is simple and relatively cheap)	T135
Apple TV would easily allow students to broadcast anything off their phones, iPads or laptops onto projectors/ TV's. This would greatly eliminate the hassle of incompatible cords, etc. I would estimate that 90% of our students have iPhones and this would allow them to easily and quickly share anything with the class that they were wanting to.	
Thought: Better CTS programming	T159
Thought: Better technology	T161
Thought: Better access to modern teaching practices.	T163
For example I heard of a school that has desks that can be hidden or stored out of that way for activities that require more space.	
Thought: purposeful use of new technology	T172
There is great opportunity to upgrade to new technology with this modernization. I would like to see new technology that is purposeful and used to TEACH students rather than just for entertainment purposes. I hope there is thought put into how the technology will be used for teaching and learning if it is going to be a part of the plan. Technology has great merit as a teaching and learning tool but I have seen a lot of money spent on technology that is barely used or used for entertainment purposes rather than teaching and learning- Smartboards that get used to watch movies more than anything else and laptops and iPads to play games on rather than using themfor a purpose. There are endless options for technology in this modernization and that is great- let's just make sure the technology installed or purchased is worth it and is going to be used effectively.	

Better science lab availability for junior high students	G34
Thought: Better science lab availability for junior high students	T63

Build and expand on outdoor spaces	G50
Thought: Outdoor spaces	T6

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

<p>Build and expand on outdoor spaces</p> <p>It is a great opportunity to create learning spaces outside of the school walls. Fresh air, exposure to the outdoors and the ability to work outside of the traditional school setting will be a benefit to students and staff.</p>	G50
<p>Thought: Play centre for elementary students</p>	T53
<p>Thought: Skate board park</p>	T55
<p>Thought: Have more oppertunities for students to get out of the class room.</p>	T71
<p>Thought: Hill in the playground</p>	T108
<p>Thought: playground equipment in 2 or 3 areas.</p>	T109
<p>Thought: build an outdoor classroom</p> <p>This would be an awesome opportunity to build an outdoor classroom. There are many designs of these in city schools. This classroom could be shared through a sign-out system. Students LOVE to get outside when they finally can in the summer and get some fresh air while they are working. Even the chance to do it once every two weeks would make them very happy.</p>	T141
<p>Thought: Solarium, cafeteria, indoor pool, cafe style area for older kids</p>	T165

<p>Classrooms/learning spaces that meet the needs of the students and teachers</p> <p>Thought: Adequate space for a variety of programs.</p> <p>A fine arts room would be an asset, however a fine arts program (Music/Drama) with a specialized teacher would be required and that would equate to funds from PLRD to pay for that teacher.</p>	G41
<p>Thought: Functionality</p> <p>I believe the structure needs to meet the teachers needs and then look at the students wants. It could be more structural or spaced out in accordance to grade levels so that it is not spread from one end of the school to the other would be a benefit to both students and teachers.</p>	T21
<p>Thought: Better use of space`</p> <p>Some classrooms are not currently being utilized within JCC. I would like to see the facility used entirely to its potential providing a variety of resources and class options for the kids.</p>	T31
<p>Thought: I would like to see the school modernized to create a comfortable area</p>	T68

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

<p>Classrooms/learning spaces that meet the needs of the students and teachers</p> <p>conducive to learning. This could take advantage of research in colors for learning, etc. I think it is important for all involved to be included in the planning. Maybe there can be murals which are created by the primary students in their area of the school, murals from elementary students in their area, etc. I think they need to be able to make their "mark" on the school expansion to have their "approval/acceptance" of the expansion.</p>	<p>G41</p>
<p>Thought: Similar grade class rooms – next door to each other but doors a little farther apart.</p>	<p>T80</p>
<p>Thought: Sound proof classrooms – no foldable walls</p>	<p>T83</p>
<p>Thought: Enough room for 20 – 30 desks</p>	<p>T92</p>
<p>Thought: Sink in every class room with a water bottle faucet</p>	<p>T94</p>
<p>Thought: lots of bulletin boards – no less than we have</p>	<p>T98</p>
<p>Thought: no foldable walls between classrooms</p>	<p>T100</p>
<p>Thought: sinks in every classroom</p>	<p>T134</p>
<p>Thought: High school classrooms need to be bigger</p> <p>High school classes at time can have close to 30 people in them. With all the desks in the class, there is no room for breakout space or collaboration areas. Room for collaborative style desks</p>	<p>T138</p>
<p>Thought: Rolling tables/desks and chairs for all students</p> <p>If all classroom desks and chairs had wheels (that locked when necessary), unlike the old style that we currently have, collaboration and movement around the classroom would be GREATLY improved.</p>	<p>T148</p>
<p>Thought: pod-like desks that attach and breakaway w/technology</p> <p>I have a printout of a really interesting, innovative, and clever way of having classroom desks. This is put out by a specific company. Desks can attach in a pod, that has a power console in the middle, and can also breakaway and stand alone. They can be short for sitting, or tall if you need to stand for a presentation, etc. They can hold laptops, etc, and have cup holders. Laptop areas can also be folded down so the desk is a flat top too. I can provide this company brochure if desired. I have shown it too many staff members who really like the idea.</p>	<p>T149</p>
<p>Thought: We should have a parent teacher meeting seperate room</p> <p>We should have a parent teacher meeting seperate room because it will look nicer that school have a seperate room for for PTM.</p>	<p>T153</p>
<p>Thought: Enough space for the students so they are not crammed in the classrooms, a proper playground. Done proper, not rushed. The funds spent properly not wasted.</p>	<p>T178</p>

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Classrooms/learning spaces that meet the needs of the students and teachers **G41**

Thought: Classrooms/learning spaces that meet the needs of the students **T187**

Too often, a classroom space is given to a teacher and they are told to just make it work even though it may not even be close to meeting the needs of their students. This new space can actually be designed to meet our students' need.

Expansion of art facilities **G30**

Thought: Music **T1**

It would wonderful to have a music program in the school. A choir/band room with a place to perform would be excellent.

Thought: Drama **T13**

I believe that we should have a drama class and host a show once a year for the community.

Thought: more focus on arts **T26**

our school puts a lot more focus on sports. Adding an auditorium would make drama classes, and shcool plays a possibility, as well as make a better place for Hanna's dance festival

Thought: Fine Arts **T50**

Opportunity for all students to have access to drama, art and music

Thought: Fine arts program **T54**

Thought: Larger arts progrAm **T56**

The arts program currently in place is limited and does not effectively allow students to explore their potential. Students need to have art displayed and regularly updated. It is a stagnant program.

Thought: Fine arts program **T78**

What a great opportunity to reintroduce a fine arts program, drama and even band. We are known for our basketball teams and not for our academics. We need the facility to develop a well rounded program for the kids of our community.

Thought: nice stage for drama, dance and grad **T103**

Thought: a sound proof drama/ music room **T104**

Thought: an art room for elementary **T105**

Thought: an auditorium/theatre with graduated seating **T133**

It would be amazing to have a place to perform plays, hold meetings, etc.

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Expansion of art facilities	G30
Thought: money should be spent on a theatre or stage with tiered seating	T176
Thought: Fine arts programming	T186
"If we build it, they will come" -- lots of high schools have fine arts theatres. Let's at least explore the possibility.	
Thought: An applicable industrial arts program - shop	T189
Thought: It would be cool if they could build a stage so that the Hanna dancers can have a proper stage, and so that we can hold competitions	T196

Expansion of PE facilities and resources	G26
Thought: Recreational teams for students	T4
Many students would be interested and willing to get involved in recreational sports. Its all about having fun and being active!	
Thought: All classes being able to have a PE class once a day	T62
Thought: 6 soccer nets	T110
Thought: more after-school sports like curling team, golf team, and a dodgeball team	T150
Thought: An intramural sports program - at lunch and after school	T190
Thought: better gym equipment	T193
Thought: a swimming pool, skating rink and nicer gyms	T194

Gymnastics	G46
Thought: Gymnastics	T2
The current gymnastics program is important in our community with many children participating.	
Thought: Gymnastics	T52

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Gymnastics

G46

We need to ensure that the Gymnastics Club is able to continue in the modernized facility. They will need storage space and floor anchors. They should be consulted in this process. This club has a very large membership and important to our community. It also increases young children's physical literacy which in turn will help them with other sports in their older years.

have a big school aquarium

G48

Thought: have a big school aquarium

T143

Schools can't have pets because of student allergies, but they still love, are interested, and become very invested in animals. It would be great to have a built in large aquarium by office or some such that students could see the same couple of fish in (with names) for years. I know that it would create discussion and interest among all the students.

Improved facilities and resources for staff

G55

Thought: Printer in the classrooms or accessible to the classrooms

T91

Thought: Storage or a cupboard in the female staff washroom

T114

Thought: plug ins for all the staff cars

T116

Thought: improvements to staff washroom

T139

Thought: have a teacher workroom for each end of the school, or division

T142

Instead of one cramped, crazy photocopier room- build one in each end of the school, or one for elementary, junior high, and senior high teachers to use.

Increased amount of common areas/ learning centers

G56

Thought: Adequate flexible spaces for students.

T11

Common areas for the different age groups to eat lunch, socialize and potentially use during the school day to facilitate learning.

Thought: Increased amount of common areas/ learning centers

T57

Students require increased collaborative areas to complete projects, study, have breaks, etc. it is also beneficial for teachers to take smaller groups to focus on smaller tasks for increased learning.

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Increased amount of common areas/ learning centers	G56
Thought: More spaces/areas for students to work (eg. Student lounge)	T61
Thought: Togetherness	T72
Having large, open, comfortable spaces for students to meet and work removes some of the stress of the school environment.	
Thought: Meeting Rooms	T73
Having more secluded tabled areas can give privacy to students that require it, as well as flat surfaces to work on.	
Thought: Sound Proof break out rooms for small groups or aide work	T82
Thought: Wide hallways with counters, stools for group work – with power	T86
Thought: a large common area for the kids like the concession or bigger.	T115
Thought: Study booths/pods for students like those in university	T147
Thought: More rooms.	T199
I would like to see a junior high chemistry room added on to the science teacher's room and separate gyms for the primary and elementary, junior high, and high school. An auditorium might be nice for the plays the elementary continue to do, it should include seats and a proper stage.	

Individual and community achievement.	G57
Thought: Institution providing everything education for all ages.	T122
Adult education and enhanced program options. First class technology, that can be entrusted with trained community members, housed in a first class technology room that can be booked/rented by the community for a fee. Small business programs, encouraging students/adults to consider entrepreneurship as an option.	
Thought: Improve school academic provincial rating	T182
Thought: Individual and community achievement.	T200
Whether it be academic or athletic achievement, students and the community are a team.	

input in the design and placement of different areas	G58
Thought: input	T35

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

input in the design and placement of different areas **G58**
Thought: input in the design and placement of different areas T76

Loft in classrooms and library for reading groups **G61**
Thought: Loft in classrooms and library for reading groups T87

Make green spaces in the school **G63**
Thought: Lots of big trees along the north west T107
Thought: Make green spaces in the school T140
 It really rejuvenates the minds of people that have to go through long, cold winters to have green spaces in schools. We have the opportunity to bring plants in- I have seen trees planted in the middle of school hallways/ areas before that have skylights above them so they can survive. It would make our school healthier, happy, and more interesting to have any types of green spaces such as this.

More community use and community feel. **G65**
Thought: variety of optional classes for students, multi purpose facility T12
 I would like to see a greater variety of optional classes for students, as well as a facility that provides something to the community, even for those who do not have children in the school.
Thought: more openness T27
 More opportunity for the community to use the school. Make it more available when the school is closed for holidays and summer- the floors being done need not be blocking the use of the space from community happenings. Having administration set the times and deadlines for maintenance rather than the maintenance men setting their own schedules or lack there of.
Thought: More education presentations for parents and community members T28
 Make the school the hub of the community, like it was years ago. This would bring more parents and community members into the schools which may increase involvement in the parent council.
Thought: Entertainment T46
 With the possibility of an auditorium the school would be used/rented for countless events. We could have a school band, drama classes, music instruction. I'm sure Stage Hanna and Music Festival would make sure this facility was well used.

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

More community use and community feel.	G65
Thought: Community members and groups welcome in school	T51
In the past JCC has been quite closed to outside organizations and groups to have access to the school but it would be great to have more of a partnership and welcome groups to use the facilities available.	
Thought: the sense that community, school, and municipality are one.	T119
I would like to see more sharing of resources: library, fitness area, VC equipment, gyms. (public library, rental of classrooms for public VC classes, joining with learning center, public rental of exercise equipment and space) pooling funds between municipalities and schools	
Thought: More community use.	T121
Thought: A facility for the community, by the community.	T123
Used for more than just daytime education.	
Thought: Community Facility (available for school/town functions)	T132
-amphitheatre/drama area with designated seating -enough gym space -space for gymnastics club	
Thought: meeting place for everyone to feel welcome in the community	T154
Thought: Use of facilities outside of school hours	T167
If we're paying for this facility, which as a tax payer I am, utilization of the gyms and weight rooms would be beneficial to our small community outside of school hours. They used to allow adult league basketball and such at one time but that disappeared a few years ago. It's got to be heated in the winter, it may as well be used	
Thought: A hub for activities and events	T170
I would like to see this new facility become a hub for activities and events for children and families in the community. I would like to see a multi - purpose area that could be used for after school activities and clubs so that children have opportunities for activities other than organized sports.	
Thought: To encourage mentoring, to have projects that bring students and community together	T184

Pride in our school	G71
Thought: Pride	T33

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

Pride in our school

G71

Having a modern facility for our kids to attend each day should elevate a sense of pride within the community. Visiting sport teams will look around and "wish" this was theirs. Parents and students should be proud of the level of education their school can provide and having an upgraded building should reduce repair costs so that the money may be used to benefit the kids directly rather than just provide a roof over their heads.

Thought: Pride. That we had a state of the art facility in the town of Hanna.

T44

Thought: Pride in our school

T77

It is always exciting to renew/refresh a building. I think that to have the building modernized will give our students, staff and community a sense of pride in our school. Perhaps this will also add to care and respect for the facility.

Thought: Some things I would like people to experience.

T152

I want people to think to themselves that "this is a nice school" when they enter. I want it not to feel gloomy and whatnot. If the school looks nice and operates better than it's current state, school will be much more enjoyable to students and teachers.

Thought: Sense of pride

T201

A new sense of ownership and consequently a feeling of pride would be a fabulous outcome of this new facility for all involved.

Separate facilities for high school and elementary

G44

Thought: make sure elementary are completely sepertated from the jr.high and high

T25

there is no need for either of the elementary or Jr.High and high school students to interact at all. Elementary should be completely separate.

Thought: Elementary wing separate from high school and junior high

T79

Thought: high school parking lot away from elementary

T111

Thought: Separated groups.

T198

The elementary and primary should be moved to one half of the school while the junior high and high school should be moved to the other. This will cause trips to classes to be shorter and bad influences not to be made on the younger students. The primary should also have a separate playground to prevent them from getting hurt by the older grades.

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

Updated and expanded curriculum	G43
Thought: variety of optional classes for students, multi purpose facility	T12
I would like to see a greater variety of optional classes for students, as well as a facility that provides something to the community, even for those who do not have children in the school.	
Thought: Open minded learning plans that are structured to suit the individual rather be it student, staff member or community member.	T16
Thought: Students to experience recognized and approved modern curriculum styles.	T18
How will our students be taught in the future? More hand-on learning activities? A play-based curriculum for kindergarten and grade 1? Laptops or other computer-type equipment for all students? for all high school students? for all jr. high and high school students? Video conferenced courses? Older children working with younger children? More time to spend outdoors? The school board needs to think about how the students of Hanna and area will be learning in 2 years, in 5 years, in 15 years, and consider these future curriculum and learning styles into the upgrading of the school. (Keeping in mind how fast technology is changing. Is it worth spending the money on something that will only be useful for a couple years)	
Thought: Optional courses	T22
Industrial arts, skills with trades partnering in the community. Fine arts facilities to put on plays, presentations, etc..	
Thought: programs	T64
I would like to see improved or maintained programs that already exist. Parents in other school division and provinces say that we have great programs for our high school and this is something that I do not want to see diminished.	
Thought: Have program options	T67
The students need to have more options to become involved in after school programs as well as during class. Students need more choices so they are able to try many different things and open their minds to all the possibilities out there. Some additional classes/programs could be offered through virtual classrooms as well, partnering with other districts possibly?	
Thought: We should be able to pick our options	T128
Thought: Dual Credit programs	T160
Thought: Curriculum	T166
It would be good to see the shop be updated and have more ability for students to experience more work in the trades. Most students don't know what to expect or what their interests are when they graduate, and end up going to college blindly, to find out that what they signed up for isn't what they thought it would be.	

What are some things you would like students, staff and community members to be able to experience and achieve in the modernized facility?

(continued)

<p>Updated and expanded curriculum</p>	<p>G43</p>
<p>Thought: Educational facilitator</p>	<p>T169</p>
<p>Now is the time to consider the opportunities for students to attend colleges or take different courses thru VC, bring the city to the rural student. Allow the rural low income students have the opportunity to continue their education without the upheaval of moving to a big city away from their families and the extra cost of living and without support.</p>	
<p>Thought: Classes in french,german,italian, etc</p>	<p>T188</p>
<p>Thought: More and better learning experiences.</p>	<p>T197</p>
<p>I hope the students will have more opportunities to learn new things and activities to enhance their learning experience.</p>	

<p>Work without unnecessary distractions</p>	<p>G74</p>
<p>Thought: Organized / Less Upheaval</p>	<p>T157</p>
<p>I am hoping for both staff and students sake more organization and clearness of purpose comes about once everything is in place. Kids do well with structure and organization. I know some kids handle change alright but learning is still easier when you know what is happening from day to day or month to month. Junior high football or not this year, archery or not this year. IA today or a sub. This teacher for phys ed today or someone else. This teacher this month, different one for the rest of the year. Between three children it is a rare day that one of them has not had something happen that was not actually by the schedule.</p>	
<p>Thought: Work without unnecessary distractions</p>	<p>T177</p>
